APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit is issued subject to all prior rights on the source and in conjunction with permit No. 4039, the same land being described in both filings. The amount of water herein allowed is placed at Eight tenths of a cubic foot per second (0.8), so that such quantity may be diverted and used in the event that there is no water whatever available in the source described in permit No. 4039. However, the total amount of water to be diverted from the combined sources described in these two permits shall not exceed the statutory allowance of Eight tenths of a cubic foot per second (0.8) for the 80 acres of land enumerated. The applicant will be required at the time of filing proof of beneficial use of water to definitely segregate the areas of land which obtain water for irrigation purposes from each of these sources so that certificates may be issued for the land to which the waters of each source are appurtenant. A standard headgate and weir must be installed at or near the point of diversion to facilitate the measurement and control of water. The State reserves the right to regulate the use of the water herein granted at any and all times.

on or before November 14, 1917.

Application of water to beneficial use shall be made on or before May 14, 1920. Proof of the application of water to beneficial use must be filed with State Engineer on or before June 14, 1920.

WITNESS MY HAND AND SEAL this 14th, day of November, 1916.

W. M. Kearney
State Engineer.

Proof of completion of work filed NOV 26 1917
Proof of labor filed MAR -1 1918
Cultural Map Filed Jan. 14-1924.
Proof of beneficial use filed JAN 14 1924
