ASSIGNED

This permit is issued subject to all prior rights on the Humboldt River Stream System. Water is granted only for the land described on the sheet attached hereto and made a part hereof. The permit is, however, granted with the knowledge that applications Nos. 1482 and 1803 each cover a portion of the same land, which applications are this day allowed. The total amount of water granted herein from Willow Creek is figured at the rate of four (4) acre feet per acre for the total area involved, so that permission is granted to store 44367.2 acre feet of water from Willow Creek in the event that no water whatever is available for storage from Rock Creek under permits Nos. 1482 and 1803. However, the total amount of water which may be stored from the two sources involved must not exceed four (4) acre feet per acre for the total area of land involved in the three permits, namely 50187.2 acre feet for 12546.8 acres. The applicant is hereby required to definitely segregate the areas of land which obtain water for irrigation purposes under each of these three permits at the time of filing proof of beneficial use of water.

It is hereby stipulated that the applicant accepts this permit with the full understanding that the diversion or storage of water will be discontinued immediately upon notice from the State Engineer that the water is required for use of prior appropriators on the stream system. A standard headgate and weir must be installed at or near the point of diversion to facilitate the measurement and control of water. The State reserves the right to regulate the period during which water may be stored and the use thereof at all times.

Full and complete plans and maps of the project must be forwarded to the State Engineer on or before July 19, 1917.

W. M. Kearney
State Engineer.
