DESCRIPTION OF PROPOSED WORKS

It is yet a problem of what method of irrigation and water development

State manner in which water is to be diverted, whether by dam or other works, whether through pipes, ditches, flumes, or other conduits. If water

will be followed. I know that the land is open public domain where it is

is to be stored in reservoirs, it should be so stated and the location of the reservoir should be given with reference to the legal subdivisions.

proposed to develop water by drilling. The area is covered with so called

water mounds where moisture is readily found by digging with a shovel.

In some places water ooozes out to surface. It is proposed to try and procure enough water for to irrigate 1280 acres if possible. Have no idea of how many wells will be needed.

5. Estimated cost of works $2000 or more as needed

6. Estimated time required to construct works five years in order to reclaim soil and raise farm crops.
