

APPLICATION FOR PERMIT

Serial No. 3242

TO APPROPRIATE THE PUBLIC WATERS OF THE STATE OF NEVADA

Date of first receipt and filing in State Engineer's office JAN. 19 1915
Returned to applicant for correction
Corrected application filed

The undersigned Katherine Hartman, J.E. Borchard and Mary Borchard, Name of applicant. of the City and , County of Ventura, State of California, hereby make application for permission to appropriate the public waters of the State of Nevada, as hereinafter stated. (If applicant is a corporation give date and place of incorporation.)

1. The source of the proposed appropriation is Virgin River, Name of stream, lake, or other source.

2. The amount of water applied for is second-feet. One second-foot equals 40 miners' inches.

3. The water to be used for Irrigation, power, mining, manufacturing, domestic, or other use.

4. The water is to be diverted from its source at the following point: This application is to change the place of use of water, Describe as being within a 40-acre subdivision of public survey, or by course and distance to a section corner. If on unsurveyed land it should be so stated. see supplemental sheet.

IF THE WATER IS TO BE USED FOR IRRIGATION, SUPPLY THE FOLLOWING INFORMATION:

(a) Number of acres to be irrigated is

(b) Description of land to be irrigated Describe by legal subdivision, or if on unsurveyed land it should be so stated and a description provided in accordance with special instruction from the State Engineer when application is returned for correction.

(c) Irrigation will begin about and end about Month. of each year. Month.

IF WATER IS TO BE USED FOR POWER, MINING, TRANSPORTATION, OR OTHER USE, SUPPLY THE FOLLOWING INFORMATION:

(d) Power to be developed is horse power.

(e) Works to be located Give 40-acre subdivision on which works will be located, or locate by course and distance to a section corner.

(f) Point of return of water to stream Describe in same manner as point of diversion.

(g) Remarks

DESCRIPTION OF PROPOSED WORKS

State manner in which water is to be diverted, whether by dam or other works, whether through pipes, ditches, flumes, or other conduits. If water is to be stored in reservoirs it should be so stated and the location of the reservoir should be given with reference to the legal subdivisions.

5. Estimated cost of works _____

6. Estimated time required to construct works _____

APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and not to exceed _____ cubic feet per second.

Actual construction work shall begin on or before _____

Proof of commencement of work shall be filed before _____

Work must be prosecuted with reasonable diligence and be completed on or before _____

Application of water to beneficial use shall be made on or before _____

Proof of the application of water to beneficial use must be filed with State Engineer on or before _____

WITNESS MY HAND AND SEAL this _____ day of _____

_____, State Engineer.

SUPPLEMENTAL SHEET

Serial No. 3242

APPLICATION FOR CHANGE IN PLACE OF USE OF THE PUBLIC WATERS OF
NEVADA.

Date of receipt and filing in State Engineer's office, JAN. 19, 1915.
Returned to applicant for correction _____
Corrected application filed _____

The undersigned, Katherine Hartman, J.E. Borchard and Mary Borchard of the City and County of Ventura, and State of California, hereby make application to change the place of use of waters heretofore applied for under Permit No. 1660, filed in the office of the State Engineer April 16, 1910 and approved by him Sept. 2, 1910.

The point of diversion as named in Application No. 1660 is given as follows: on or about 120 rods north of SW corner Sec. 5, T. 15 S.R. 69 E.

The source named in Application No. 1660 is Virgin River.

The land named to be irrigated in Application No. 1660, is as per list attached marked "I" Original list

Whereas, this application No. 1660 has not been approved the time as extended for the completion of the irrigation works mentioned therein being limited to January 1, 1915, and the time for filing proof of beneficial use of the water upon the said listed lands being limited to Feby. 1, 1915, and

Whereas, the several pieces or parcels of lands on list attached and marked "II omit" have been entirely washed away since the issuance of said permit rendering impossible the beneficial use of water thereon and,

Whereas, portions of the several pieces or parcels of land on list attached and marked "III Add" lie naturally under the irrigation system according to said permit and as constructed, the total amount of water required for the listed lands being less than as originally listed, and there being no other lands that can be prejudiced by such change, and

Whereas, a bona fide attempt is being made to comply with the conditions of said permit and reduce the wild and desert lands to cultivation with all possible diligence, but proof of beneficial use of the water on said lands requested to be added cannot be made until the allowance or disallowance of this application.

Now therefore, in view of the impossibility of using the water beneficially on the lands listed under "II" attached, the natural position of the lands listed under "III" attached to receive water from this system, the extension of the time for filing proof of beneficial use of the water granted by said permit before the time will have run for the granting of this application, the attempt in good faith with all reasonable diligence to comply with said permit in spite of the unfortunate physical conditions inherent in the Virgin River, and the fact that no other users will be prejudiced by such change, less water being required than originally allowed, application is hereby made to change the place of use of the water granted in Permit No. 1660 from list "II" to list "III" and an extension of six months time from Feby. 1, 1915, for the filing of final proof of beneficial use of the water granted under Permit No. 1660 on the said listed lands as amended is requested.

The point of initial diversion will remain unchanged.

The number of acres to be irrigated is about 2000.

The quantity of water applied for use on said listed lands as amended is 30 cu ft per sec., since a continuous flow of water is necessary at the start to remove the excess mineral or alkali, since the soil is largely wash sand with no subsoil, and since both winter and summer crops of grain and vegetables will be raised on the same land.

Irrigation will be continuous during the 12 mos. of the year.

The water will be returned to the river.

The works as practically completed and the cost remain as given in said Permit No. 1660.

The new secondary intake cannot be completed before 3-1-15.
