13. Estimated time required to construct works two to three years
If well completed, describe well.

14. Estimated time required to complete the application of water to beneficial use four to five years

15. Provide a detailed description of the proposed project and its water usage (use attachments if necessary): (Failure to provide a detailed description may cause a delay in processing.)

Water under this permit would be put to beneficial use by Pabco Building Products, LLC (Pabco). Pabco has an existing gyspum mining and milling operation within Black Mountain Hydrographic Basin; the gypsum is used to manufacture drywall board (gypsum board) for use in the housing industry. Due to a slowdown in housing construction drywall production at Pabco has seen a slowdown as well, however Pabco has a strong financial base and is forecasting renewed development and therefore a need for additional water supply in the future. Pabco estimates their need for additional water is between two to five years and would like to secure this water right.

16. Miscellaneous remarks:

As such, this change application requests a duty of 250 afa, along with the change applications under existing permit Nos. 58051 and 61597 that each request a duty of 250 afa. The total combined duty requested under these three change applications is 250 afa.
