

TO APPROPRIATE THE PUBLIC WATERS OF THE STATE OF NEVADA

Date of first receipt and filing in State Engineer's office AUG 18, 1917
Returned to applicant for correction
Corrected application filed

The undersigned Jennie Duvivier
Name of applicant.
of Golconda, County of Humboldt,
State of Nevada, hereby make application for
permission to appropriate the public waters of the State of Nevada,
as hereinafter stated. (If applicant is a corporation give date and
place of incorporation.)

- 1. The source of the proposed appropriation is Jackson Creek
Name of stream, lake, or other source.
2. The amount of water applied for is 3.20 second-feet.
One second-foot equals 40 miners' inches.
3. The water to be used for Irrigation and Stock purposes
Irrigation, power, mining, manufacturing, domestic, or other use.
4. The water is to be diverted from its source at the following
point: NE 1/4 SW 1/4 Sec. 19, T. 40 N., R. 31 E., M.D.M.
Describe as being within a 40-acre subdivision of public survey, or by course and distance to a section corner. If on unsurveyed land it should be so stated.

IF THE WATER IS TO BE USED FOR IRRIGATION, SUPPLY THE FOLLOWING INFORMATION:

- (a) Number of acres to be irrigated is 320
(b) Description of land to be irrigated E 1/2 SE 1/4, SW 1/4 SE 1/4 Sec. 13;
Describe by legal subdivision, or if on unsurveyed land it
NW 1/4 NE 1/4 and NW 1/4 Sec. 24, T. 40 N., R. 30 E. M.D.M.
should be so stated and a description provided in accordance with special instruction from the State Engineer when application is returned for correction.
(c) Irrigation will begin about March and end about
Month.
September, of each year.
Month.

IF WATER IS TO BE USED FOR POWER, MINING, TRANSPORTATION, OR OTHER USE, SUPPLY THE FOLLOWING INFORMATION:

- (d) Power to be developed is horsepower.
(e) Works to be located
Give 40-acre subdivision on which works will be located, or locate by course and distance to a section corner.
(f) Point of return of water to stream
Describe in same manner as point of diversion.
(g) Remarks

10000

DESCRIPTION OF PROPOSED WORKS

Small diverting dam and ditch to land to be irrigated.

State manner in which water is to be diverted, whether by dam or other works, whether through pipes, ditches, flumes, or other conduits. If water

is to be stored in reservoirs it should be so stated and the location of the reservoir should be given with reference to the legal subdivisions.

5. Estimated cost of works 200.00

6. Estimated time required to construct works 3 years

7. Remarks This application is made for the purpose of correcting error in location of land described in application No. 3751 and water is to be used with the water from Permit No. 2347 from Quinn River. The water from Jackson Creek will probably be used, in normal years until about July, when water will be used from Quinn River for that portion of land under ditch from said Quinn River JENNIE DUVIVIER, Applicant.

APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit is issued subject to all prior rights on the source. Water right for 10.2 acres of land in the NW 1/4 NE 1/4 Sec. 24 and 2.4 acres of land in the SE 1/4 NW 1/4 Sec. 24, all in T. 40 N., R. 30 E. is excluded from this permit, the water right for such land being claimed in the proof of beneficial use filed under permit No. 1556.

The full statutory allowance of 3.076 cubic feet of water per second for the balance of the land herein described is allowed, notwithstanding the fact that a full water right from Quinn River under permit No. 2347 is already held by the applicant herein, as well as full water right from Mary Sloan Creek under permit No. 3752. In this manner, the full statutory amount of 3.076 cubic feet of water per second may be diverted under this permit and used in the event no water whatever is available from the sources heretofore mentioned. However, the total amount of water granted from all of the sources described in these three permits must not exceed the statutory allowance for the maximum area of land therein described.

The applicant will be required, at the time of filing proof of beneficial use of water, to definitely segregate the areas of land irrigated from Mary Sloan Creek under permit No. 3752 and the land irrigated under this permit, while the land in conflict eventually awarded a water right under permit No. 2347 will be deducted from any certificate issued under permits Nos. 3752 and 4544.

A standard headgate and weir must be installed at or near the point of diversion to facilitate the measurement and control of water. The State reserves the right to regulate the use of the water herein granted at any and all times. It is distinctly understood that applicant agrees to the terms herein contained.
