This sheet inspected, Engineer.

APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and not to exceed 1.6 cubic feet per second.

Actual construction work shall begin on or before June 22, 1921

Proof of commencement of work shall be filed before July 22, 1921

Work must be prosecuted with reasonable diligence and be completed on or before June 22, 1924

Proof of completion of work shall be filed before July 22, 1924

Application of water to beneficial use shall be made on or before June 22, 1926 Proof of the application of water to beneficial use must be filed with State Engineer on or before July 22, 1926

WITNESS MY HAND AND SEAL this 22nd day

of January 1921

Proof of labor filed MAY 14 1921

Map filed June 28 1921

Cancelled MAY 28 1942 because of failure

of applicant to comply with the provisions of permit

J. L. Durrett State Engineer

Handwritten signature and stamp at bottom left.

This permit is issued subject to all prior rights on the source, and in conjunction with permit No. 5259, both of which describe the same land as proposed to be irrigated. The amount of water herein granted is placed at the full statutory allowance of one and six tenths (1.6) cubic feet per second for the total acreage of land proposed to be irrigated, notwithstanding the fact that a portion of such land is granted a water right under permit No. 5259 from Buck Spring, so that such amount of water may be diverted from the source herein described and used in the event that there is no water whatever available from the source under permit No. 5259. However, the total amount of water used at any time from both sources named in the two permits shall not exceed the statutory allowance of 1.6 cubic feet of water per second for the maximum area of 160 acres of land described in the two permits. The applicant will be required, at the time of filing proof of beneficial use of water, to definitely segregate the areas of land which obtain water for irrigation purposes from each of the sources described in the two permits, so that certificates can be issued for the land to which the water of each source is appurtenant. A substantial headgate and weir must be installed and maintained at or near the point of diversion to facilitate the measurement and control of water. The State reserves the right to regulate the use of the water herein granted at any and all times. It is distinctly understood that applicant agrees to the conditions herein contained.
