11. Description of proposed works. (Under the provision of NRS 535.010 you may be required to submit plans and specifications of your diversion or storage works.) (State manner in which water is to be diverted, i.e. diversion structure, ditches, pipes and flumes or drilled well, pump and motor, etc.)

Exploratory well drilling will be done to locate a secondary water potable supply well for the Valley of Fire State Park. If successful, a well will be developed and connected to existing water supply mains, in accordance with the regulations of the Bureau of Safe Drinking Water, NDEP.

12. Estimated cost of works $400,000

13. Estimated time required to construct works two years
If well completed, describe well.

14. Estimated time required to complete the application of water to beneficial use five years

15. Provide a detailed description of the proposed project and its water usage (use attachments if necessary):
(Failure to provide a detailed description may cause a delay in processing.)

State Parks will conduct an exploratory well drilling program to locate a secondary water supply well for the Valley of Fire State Park. If a suitable pilot hole with a sufficient potable water source can be located, the pilot hole will be reamed and cased (8") and developed into a potable water supply well. The park water system services two campgrounds, a visitor's center, day use areas, entrance stations, a shop and 4 residences.
