Permit No. 80541

THE STATE OF NEVADA

PERMIT TO APPROPRIATE WATER

Name of Permittee:	**MARY ANN ADKINS, ROLAND SALA AND JOHN SALA**
Source:	**UNDERGROUND**
Basin:	**ELKO SEGMENT**
Manner of Use:	**COMMERCIAL**
Period of Use:	**JANUARY 1ST TO DECEMBER 31ST**
Priority Date:	**02/04/2011**

****

APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit is issued subject to existing rights. It is understood that the amount of water herein granted is only a temporary allowance and that the final water right obtained under this permit will be dependent upon the amount of water actually placed to beneficial use. It is also understood that this right must allow for a reasonable lowering of the static water level. This well shall be equipped with a two (2) inch opening for measuring depth to water. If the well is flowing, a valve must be installed and maintained to prevent waste. A totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of water begins, or before the Proof of Completion of Work is filed. This source is located within an area designated by the State Engineer, pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

This permit is issued for commercial purposes for the parcels identified by Elko County as APNs 006-09G-038 and -039. Upon cessation of pumping for commercial purposes at this place of use, the water under this permit shall return to the groundwater source and no application to change will be allowed.

The point of diversion and place of use are as described on the submitted application to support this permit.

(Continued on Page 2)

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, **and not to exceed 0.05 cubic feet per second or 7.84 acre-feet annually.**

Work must be prosecuted with reasonable diligence and proof of completion of work shall be filed on or before: **July 15 2012**
Water must be placed to beneficial use and proof of the application of water to beneficial use shall be filed on or before: **July 15 2013**
Map in support of proof of beneficial use shall be filed on or before: **July 15 2013**

IN TESTIMONY WHEREOF, I, JASON KING, P.E.,

State Engineer of Nevada, have hereunto set my hand and the seal of my office, this 15th day of **July**, A.D. **2011**

J. K. P.E.
State Engineer

APPLICATION FOR PERMIT TO APPROPRIATE THE PUBLIC WATERS OF THE STATE OF NEVADA

THIS SPACE FOR. OFFICE USE ONLY

Date of filing in State Engineer's Office FEB 04 2011

Returned to applicant for correction _____

Corrected application filed _____ Map filed FEB 04 2011

The applicant Mary Ann Adkins, Roland Sala and John Sala

P.O. Box 156 (Street Address Or P.O. Box) of Cascade (City or Town)

Idaho, 83611 (State and Zip code No) hereby make(s) application for permission to appropriate the public waters of the State of Nevada, as hereinafter stated. (If applicant is a corporation, give date and place of incorporation; if a copartnership or association give names of members.)

1. The source of water is Underground (Name of stream, lake, underground, spring or other sources)

2. The amount of water applied for is 0.05 cfs (One second foot equals 448.83 gallons per minute.) second feet.

   (a) If stored in reservoir give number of acre-feet _____

3. The water to be used for Commercial & Domestic (Irrigation, power, mining, commercial, domestic or other use. Must limit to one major use.)

4. If use is for:

   (a) Irrigation, state number of acres to be irrigated _____

   (b) Stockwater, state number and kind of animals _____

   (c) Other use (describe fully in No. 12) _____

   (d) Power:

      (1) Horsepower developed _____

      (2) Point of return of water to stream _____

49-EL

5. The water is to be diverted from its source at the following point: (Describe as being within a 40-acre subdivision of public survey, and by course and distance to a found section corner. If on unsurveyed land, it should be so stated.)

NW1/4 SW1/4 of Section 20, T.34 N., R.55 E., M.D.B. & M., at a point from which the Northwest Corner of said Section 20, bears N 03° 52' 22" W, 3794.36 feet.

6. Place of use (Describe by legal subdivision. If on unsurveyed land, it should be so stated)

Portions of the NW1/4 SW1/4 and the SW1/4 SW1/4 of Section 20 T.34 N., R.55 E., M.D.B. & M. being Elko County Assessor Parcel No.'s 006-09G-038 and 006-09G-039.

7. Use will begin about January 1st (Month and Day) and end about December 31st (Month and Day) of each year.

8. Description of proposed works (Under the provisions of NRS 535.010 you may be required to submit plans and specifications of your diversion or storage works.) (State manner in which water is to be diverted, i.e. diversion structure, ditches and flumes, drilled well with pump and motor, etc.)

A drilled and cased well equipped with a motor, pump and pipelines.

9. Estimated cost of works: $10,000

10. Estimated time required to construct works: well complete (no well log could be located) (If well completed, describe works.)

11. Estimated time required to complete the application of water to beneficial use 5 years

12. Provide a detailed description of the proposed project and its water usage (use attachments if necessary): (Failure to provide a detailed description may cause a delay in processing.)

A drilled and cased well equipped with a motor, pump, and pipelines to serve 18 mobile home, spaces, and a bar with attached single family residence. The annual consumptive use is calculated as follows: 18 mobile home spaces x 300 gallons per day = 5400 gallons per day. Bar with 40 fixture units x 15 gallons per day = 600 gallons per day and 1 residence x 1000 gallons per day for a total of 7000 gallons per day. 7000 gallons per day x 365 day per year = 2,555,000 gallons per year or 7.84 acre feet annually.

13. Miscellaneous remarks:

According to the applicants the property associated with this well was purchase by their father in 1958. The well, bar, residence and approximately 8 of the mobile home spaces were existing at the time the property was purchased. Their father added the additional 10 mobile home spaces and remodeled the bar in the mid to late 1960's. Recently, while trying to sell this property, the applicants discovered that the well on the property had never been permitted by the Division of Water Resources. This application is being filed in order to "legalize" the well on the property. The use of the waters from this well will remain the same as the long time historical use as stated.
