~~Description of irrigated land~~ Description of works:-

The flow of the spring has been increased by an open cut approximately 60 feet long. A rock culvert has been laid in the bottom of this cut and covered over, thereby furnishing a clear passage for the water. From the end of this culvert, the water is conveyed by means of a 1½ inch pipe, 8 feet in length, to ten troughs, the total length of these troughs aggregating approximately 120 feet. Each of said troughs is one foot wide and ten inches deep. Since May, 1912, these troughs have been used for the conservation of water sufficient for 3300 head of sheep and 100 head of cattle and other animals.

Description of use ~~other than irrigation~~

---------- Stockwatering and domestic purposes ----------

The right to water hereby determined is limited to the period between May 1st and Dec. 1st of each year for stock, and the use is restricted to the place where acquired and to the purpose for which acquired; rights for irrigation not to exceed three acre-feet per year for each acre of land for which appropriation is herein determined. Continued title to water depends upon beneficial use of water appropriated.

IN TESTIMONY WHEREOF, I W. M. KEARNEY, State Engineer of Nevada, have hereunto set my hand and the seal of my office, this Fourteenth day of May, A. D. 1913.
