NOW KNOW YE, That the State Engineer, under the provisions of Section 72, Chapter 140, Statutes of 1913 has determined the date, source, purpose and amount of such appropriation, together with the place to which such water is appurtenant, as follows:

Name of appropriator Otillio O. Tognini,

Amount of appropriation 0.0125 of a cubic foot of water per second.

Period of use, from April 1st to November 1st of each year

Date of priority of appropriation June 7th, 1919.

Description of works of diversion and use:-

A cut 2' wide and 40' long has been made at each of the springs (the lower spring being located in the NE¼SE¼ Sec. 16, about 350 northerly from the spring to which the tie is given above). The water is piped from said cuts through 22' of 1½" pipe to a series of three watering troughs at each spring, each of said troughs being 1' wide, 1' deep and 12' long. In this manner water is conserved for watering approximately 200 head of cattle during the period above specified. Approximately 2300 head of sheep are also watered during June and July. It is understood that the amount of water set forth in this certificate covers the amount used from both springs.

The right to water hereby determined is limited to the amount which can be beneficially used, not to exceed the amount above specified, and the use is restricted to the place where acquired and to the purpose for which acquired.

IN TESTIMONY WHEREOF, I, J. G. Scrugham, State Engineer of Nevada, have hereunto set my hand and the seal of my office, this 18th day of July, A.D. 1922.
