Thereafter the complainant and all of the defendants in the said action, other than the defendant Thomas B. Rickey, entered into a written stipulation in the suit, selecting and appointing one Henry Thurtell as Special Master in the said cause for the purpose of ascertaining and fixing the several rights of the complainant and of the said defendants, other than the said Thomas B. Rickey. Thereafter the said Henry Thurtell as such Special Master, pursuant to the said stipulation, gathered, assembled and published the said proofs and his findings thereon, and thereafter certain of the said defendants filed protests to the findings of the said Henry Thurtell, and thereafter and on the 18th day of June, 1909, the said protestants entered into an agreement in writing with the complainant in the words and figures hereinafter set forth.

Thereafter and on the 30th day of March, 1910, the said protestants withdrew and dismissed their said protests, and thereupon the said Henry Thurtell as such Special Master filed herein his report and findings fixing the rights

of the said complainant, and the said defendants other than the said Thomas B. Rickey, in and to the waters of Walker River and its tributaries, and the said stipulation, findings, withdrawal and dismissal of protest and agreement are in the words and figures following, to-wit:

PACIFIC LIVE STOCK COMPANY
vs.
T. B. RICKEY, et al.

STIPULATIONS AS TO TRIAL OF CAUSE.

For the purpose of more conveniently determining the issues of fact existing between the undersigned as parties to the above-entitled suit, we, the undersigned, do hereby stipulate and agree as follows:

1. The proofs concerning the appropriation and use of the water of Walker River by the undersigned parties to this suit are to be gathered by Henry Thurtell, the State Engineer of the State of Nevada, and his associates, in the manner defined by the Statutes of Nevada, 1903, Chapter 4, Sections 1 to 14, so far as said statute is applicable under this stipulation. The said Henry Thurtell shall then, from the evidence so obtained, determine the respective priorities and extent thereof upon the stream, and the respective quantities of land to which such priorities attach, and shall find the quantity of water in cubic feet per second to which each party hereto is entitled, and shall also find upon all questions pertaining to the use of the waters of said stream by the parties hereto, and by their predecessors in interest. Said proofs shall be assembled by him, printed in pamphlet form, together with his findings thereon, and a copy sent, either by mail in the usual manner or delivered personally, to each party to this stipulation. At any time within one hundred and twenty days after the said publication and delivery or mailing of said proofs, any of the parties hereto may file a protest against any finding or findings, stating in such protest wherein the findings are excessive or otherwise incorrect; and any such finding or findings to which no such protest shall be filed shall be deemed allowed as of course. Such protests shall be heard by the said Henry Thurtell at times and places to be designated by him, upon reasonable notice to the parties involved in such protests and their solicitors. Upon the hearing of any protest, the claimant shall have the right and may be required to furnish additional testimony under oath concerning the contested findings, and the protestant shall be entitled to produce such evidence as may be relevant and competent; and all witnesses examined on such hearings shall be subject to cross-examination according to the rules of law, and all the testimony and proceedings shall be reported by a competent shorthand reporter.

2. When the proofs of appropriation and use shall have been so gathered, assembled, and published, and such protests made and heard as above prescribed, the said Henry Thurtell shall make such new, additional and corrected findings as the evidence and proofs require. He shall thereupon present to and file in this Court his findings upon said issues in this suit, as between the parties hereto, together with the evidence so taken, and serve a copy thereof within five days after said findings have been presented to the Court upon each solicitor or firm of solicitors signing this stipulation.

3. The findings so made and filed shall be subject to review and correction by the Court upon exceptions filed; and when the findings are so settled by the Court, the final decree in this cause, so far as concerns the rights of the parties hereto as between themselves and their successors in interest shall be based upon such findings and the law applicable thereto. Such exceptions shall be filed in said Court within sixty days after such service.

4. The expenses of the hearing upon any protest before said Henry Thurtell, including the fees and mileage of witnesses, the fees of the shorthand

reporter, and the cost of depositions used on such hearings, shall be deemed costs in this cause and be taxed as the Judge of this Court may direct.

5. Should the said Henry Thurtell die, or cease to be the State Engineer, before the completion of said work, such part of the work theretofore completed may be used and adopted by his successor, if one is agreed to by all parties hereto, it being understood that his successor in said office shall not be entitled to proceed under this stipulation, except by consent of all parties hereto.

6. In making up his findings the said Henry Thurtell shall observe the following rules, which are hereby stipulated to be correct statements of the law applicable to this case:

(*a*) To constitute a valid appropriation there must be an actual diversion of the water from the stream and an actual application of the water to a beneficial use.

(*b*) The means employed in the diversion of the water and its application to use are immaterial, except that they must be such as to conduce to a reasonable and economical diversion and application, provided that all unused water shall be returned to the stream, where it is practicable.

(*c*) Every appropriator has the right to change at will the place and means of his diversion and carrying of the water, and the place and character of its use; and he does not thereby lose any priority of right which he may have acquired, except in so far as such change may be prejudicial to the rights of others previously acquired. For example, one who has appropriated water through a certain ditch may discontinue the use of that ditch, and carry the appropriated water through another ditch, heading at a different point on the stream, without losing his priority, except in so far as such change may deprive another person of a right acquired before the change. But, on the other hand, though one who has appropriated water to run a mill may afterwards use that water for irrigation, he cannot make that change so as to prejudice those who, before he commenced to irrigate, had acquired rights by appropriation. A change in the use of water is not necessarily an abandonment of the appropriation for the first use.

(*d*) A valid right of appropriation may be lost by abandonment. A mere failure to divert or use the water, however long continued, does not constitute abandonment, unless accompanied with the intent not to again use it. The intent to abandon may be inferred from circumstances, but should not be presumed except from clear evidence. But while mere non-user does not amount to abandonment, that fact is competent evidence on the question of abandonment, and if continued for an unreasonable period it may indicate an intent to abandon, and may warrant the deduction of the fact of abandonment. The presumption, however, is not conclusive and may be overcome by other satisfactory evidence. Mere non-user, if continued for five years or more, may, however, result in a forfeiture of the right or render the right subservient to the prescriptive right of another.

(*e*) The notorious, peaceable, exclusive, adverse and continuous use under claim of right, by a user up the stream of water claimed to have been appropriated by another, at a point lower down on the stream, gives to such adverse user title to such water by limitation or prescription, but such adverse user must have continued without adverse interruption for a period of five years, or more, after such prior appropriator had obtained a complete right of action therefor against such upper adverse user.

(*f*) Where an appropriator of water has prosecuted the work of appropriation with reasonable diligence and brought it to completion within a reasonable time, his right of appropriation relates back to the time when the first step was taken to secure it; but if the work of appropriation is not prosecuted with reasonable diligence and brought to completion within a reasonable time, his right of appropriation does not relate back to the time when the work of appropriation was commenced, but is to be deemed to have been acquired only at the time when the work of appropriation was completed and the water

actually diverted from the stream and put to a beneficial use. The appropriator must have exercised that degree of diligence which will indicate the constancy and steadiness of purpose and labor usual with men engaged in like enterprises, who desire and intend a speedy accomplishment of their designs.

(*g*) All questions of fact, or law or equity, or procedure involved in this suit not provided for in this stipulation, shall be determined by the Court upon application of any party hereto, and all proceedings upon such application, including the giving of notice, shall be had and taken in accordance with law and the rules of the court.

7. No party shall be entitled to present on the hearing of any protest any evidence other than through sworn witnesses or competent documentary evidence. No *ex parte* affidavit, or other *ex parte* statement, shall be received on such hearing except as against the person making the same, or his successor in interest. The said Henry Thurtell may, in his discretion, either admit or exclude offered evidence, subject to objection, to be stated at the times such evidence is offered, or certify to the Court the question of the admissibility of any evidence objected to; and thereupon further proceedings upon the specific matter objected to, shall await the action of the Court thereon. If the said Henry Thurtell shall improperly admit or reject any evidence objected to, the Court, upon its review of the findings of the said Thurtell, shall admit such evidence, if the same ought to have been admitted, or exclude the same, if the same ought to have been excluded, and the Court shall thereupon correct said findings, or make new findings, according to the facts and without returning the matter to said Henry Thurtell for any further action by him. None but legal evidence shall be admitted or considered on the hearing of the protest. Any witness previously examined by the said Thurtell shall be subject to cross-examination by any party to the protest, providing such witness, at the time of the hearing of the protest, is living and mentally competent.

8. The Government of the United States of America may, at its option, become a party to the above-entitled suit and to this stipulation in the following manner, and within the time hereinafter specified: Immediately upon the filing of this stipulation the Clerk of said Court shall deliver in person to the United States Attorney for the District of Nevada a certified copy of this stipulation. If, within thirty days after said service of said certified copy, the Government of the United States of America shall, through its legally authorized officer or officers, file with the Clerk of this Court a notice that it desires to become a party to this suit, and to this stipulation, and shall serve copies of said notice upon the solicitors for all the parties to this suit, then the Court may enter an order making the Government of the United States of America a party to this suit. Within thirty days after the making an entry of such order, the said Government shall file and serve upon the solicitors for all the parties to the suit, its pleading in this suit, which pleading need not be in any particular form, but which shall set forth, specially and particularly, what rights the said Government claims in or to the waters of said Walker River, and the basis and origin of the rights so claimed, and the times at which they respectively accrued; and such pleading shall be deemed sufficient to entitle said Government, in the most liberal manner possible, to the full and complete presentation of its cause of action or defense or equitable rights concerning the matters in controversy in this suit, or in anywise appertaining thereto, and to have the same adjudicated in and by the decree of the Court in this suit.

9. This stipulation shall have no force or effect until signed by all parties to this suit, and their solicitors, except Thomas B. Rickey; provided, however, that the same may be put in force and become binding, as between the parties subscribing the same, if an endorsement to that effect be made hereon and signed by Isaac Frohman or Frank H. Short, and Cheney & Massey, and Mack & Farrington, and George S. Green.

10. This stipulation is made subject to the approval of the court, and upon such approval it is agreed that the said Court may enter an order appointing the said Henry Thurtell a special Master in Chancery in this suit,

to take such testimony and evidence and perform such duties herein as are provided by the terms of this stipulation. The findings and decree made, as in this stipulation provided, shall have the same weight, force, and effect as would attach to the same if this suit had been tried altogether in accordance with the usual rules and methods of practice of said Court.

11. Should complainant obtain judgment herein the same shall not be effective against the defendants signing this stipulation, unless this action is prosecuted against Thomas B. Rickey and his assigns to judgment upon the merits.

Witness our hands, this ..... day of ....., 1907.

EXPLANATORY STATEMENT.

The foregoing stipulations were signed by the Pacific Livestock Company and by Cheney, Massey & Price, Attorneys for the Fox, Mickey & Greenwood Ditch Companies; by Mack & Greene, Attorneys for the Walker River Water Users' Association; by S. S. Downer, Attorney for J. B. Gallagher; by John D. Lothrop, Attorney for W. H. Penrose, H. F. Swasey, S. W. Gregory and Alfred Gifford; by H. M. Kidd, Attorney for Henry Wood, J. O. Birmingham, Chas. Snyder and Chas. Johnston, and by all the defendants or their successors in interest with the following exceptions, namely: Hugh Brady, T. F. Fitzpatrick and M. J. Green.

The stipulations, as signed, were filed with the Clerk of the Court in May, 1907, and in July, 1907, tentative findings were prepared, printed, and a copy sent to each person using water from the Walker River in Nevada, and a copy of these findings were sent to each attorney of record in the case.

On October 22, 1907, a meeting was held in the State Engineer's office at Carson City, Nevada. At this meeting were present, W. A. Massey, Attorney for the Fox, Mickey and Greenwood Ditch Companies; C. E. Mack and Geo. S. Green, Attorneys for the Walker River Water Users' Association; S. S. Downer, Attorney for J. B. Gallagher; Isaac Frohman, Attorney for the Pacific Livestock Company; G. Waldo, representing the interests of the Greenwood Ditch Company; D. W. Melarkey, representing the interests of the Mickey Ditch Company, Patrick Gallagher, J. I. Wilson, L. R. Ames, J. E. Gignoux, and J. W. Simpson, representing the interests of the Walker River Water Users' Association; J. B. Gallagher, P. Clifford, J. R. Van Nagell and Henry Thurtell, Special Master in Chancery.

It was the unanimous wish of all present that Mr. Thurtell should, within the succeeding twenty days, allow all persons to make such corrections to their claims as the facts warranted, and that after the expiration of the period named he should compile the corrected findings, print them, and mail a copy of these amended findings to each user of water and to each attorney. The findings so made should be considered the findings of the Special Master in Chancery made under the stipulations as signed by the litigants and filed with the Clerk of the Court. Under the stipulations any person desiring to protest against any finding must file a definite written protest against the findings at the State Engineer's office within one hundred and twenty days after the date of mailing the findings.

In accordance with their unanimous desire, the Special Master in Chancery prepared an amended statement of findings with such corrections as the facts shown appeared to warrant, and January 27, 1908, mailed copies of these amended findings to each user of water and to each attorney.

No protests were filed against any of the findings until May 26, 1908. Upon that date the firm of Mack & Green filed protests on behalf of the Walker River Water Users' Association against the findings made in favor of the Pacific Livestock Company, and a number of protests against certain findings upon the ground that oversight or error had been made in the claims submitted. These latter protests were of minor importance and upon the hearings held in October were either withdrawn or the correction sought was obtained without opposition upon proof being made in support of the claim. Proof was made

that Lamira Glann had no interest in the Gignoux ditches, and the right given her to take water therefrom should be canceled. Consent was given that 40 acres and .48 sec. ft. with a priority of 1865 should be added to the findings in favor of the Mickey Ditch Company. Proof was made that 5 acres and .08 sec. ft., with a priority of 1861, should be added to the findings in favor of J. A. Rogers. Proof was made that 13½ acres and .21 sec. ft. with a priority of 1901 should be added to the findings in favor of Thomas Hall. Consent was given that a finding should be made in favor of Frank P. Shirley for 105 acres and 1.28 sec. ft. with a priority of 1898, and 155 acres and 1.85 sec. ft. with a priority of 1900 watered by the Nichol Ditch. Consent was given that the findings in favor of G. S. Simpson should be corrected to read .80 sec. ft. instead of 80 sec. ft. Consent was given that the right accorded to the Pacific Livestock Company, which on page 12 of amended findings reads 100 acres, 1883, 8.40 sec. ft., should be corrected to read 700 acres, 1883, 8.40 sec. ft. Consent was given to correct the findings in favor of Mrs. Adeline Hilbun, which erroneously reads "from the Spragg Allcorn and Buley Ditch" to read "from the Hilbun Ditch."

The hearings relative to the protests were begun in October, 1908. They were continued for 16 days in October and then adjourned until December of the same year. In December the hearings were continued for ten days. In all about thirty witnesses were examined.

Nearly all of the testimony offered concerned the rights to water of the Pacific Livestock Company, and was given in support of or in opposition to the protest filed against the findings in favor of that company.

At the end of twenty-six days of hearings the attorneys for both sides announced that they believed they could agree upon the findings in favor of the Pacific Livestock Company, and asked that the hearings be discontinued in order to give them time for consultation. At the end of three days of consultation they announced to the Master in Chancery that they had agreed upon a set of findings and asked that adjournment be taken for sixty days in order that they might have time to draw up an agreement that should cover the points that had been agreed upon.

Continuances of the hearing on the protest against the findings made in favor of the Pacific Livestock Company were regularly made from time to time as the settlement agreement between the members of the Walker River Water Users' Association and the Pacific Livestock Company was being drafted and the signatures obtained. It was considered necessary to get the signatures of all parties to this settlement. There were eighty-four persons and they were scattered through several states. The work was, however, completed on March 30, 1910, and the Master in Chancery was notified at once that the protest against the findings of the Pacific Livestock Company had been withdrawn.

At a hearing held March 11, 1910, the Master in Chancery announced that D. J. Butler and Antone Tamagni had filed proofs too late to have their rights recognized in the original findings. The Master announced that these proofs indicated that Mr. D. J. Butler was entitled to a finding in his favor for sufficient water to irrigate 40 acres of land or .64 sec. ft. from the Jasper Daniels Ditch with a priority of 1890, and that Mr. Antone Tamagni, the successor in interest to DeWitt Crowinshield, was entitled to sufficient water, .48 sec. ft., to irrigate 40 acres of land with a priority of 1873, and 70 acres of land or .84 sec. ft., with a priority of 1878, both from the Nichol Ditch.

The Master announced that he had notified all the attorneys in the case of the claims filed on behalf of Antone Tamagni and D. J. Butler, and had asked that if objection was had to the preparation of findings in accordance with the claims, that the objection be made to the Master in open hearing. No objection was made to including these findings with others in this report to the Court, and they will be found regularly listed with all the other claims in the succeeding findings.

WITNESSETH:

THAT WHEREAS, a stipulation was heretofore entered into between the party of the first part, Pacific Livestock Company, a corporation, and certain parties defendant in a certain suit now pending in the Circuit Court of the United States, Ninth Circuit, District of Nevada, entitled "Pacific Livestock Company, a corporation, complainant, versus Thomas B. Rickey, et al., defendants", Number 731, involving the determination of the rights and priorities of the said parties to appropriate and use for beneficial purposes the waters flowing in Walker River and its tributaries, in which stipulation it was provided, among other things, that Honorable Henry Thurtell should find the respective rights and priorities of appropriation of the waters of said stream of the parties to said stipulation, subject to the right of any of said parties to said stipulation to protest against the findings of said Henry Thurtell, and to hearings on such protests, and subject also to review and correction of the said findings by the above named Court;

AND WHEREAS, the said Henry Thurtell thereafter, to-wit, on or about the thirtieth day of July, A. D. 1907, made his findings as to the rights and priorities of the said waters, and thereafter, to-wit, on or about the 27th day of January, 1908, the said Henry Thurtell, by consent of the parties to said stipulation, amended and corrected the said findings and published and served the same as provided in said stipulation, and thereafter, to-wit, on or about the 26th day of May, 1908, certain of said parties of the second part protested against the amended findings of said Henry Thurtell as to the rights and priorities of said party of the first part, and said protest was thereafter partially heard by said Henry Thurtell, and pending said hearing the said protestants and said Pacific Livestock Company entered into an agreement to settle and compromise the matters so in dispute between them;

NOW, THEREFORE, for the purpose of carrying out said agreement, settlement and compromise between the said several parties of the second part and the Pacific Livestock Company, it is hereby stipulated, admitted and agreed by and between the respective parties to this agreement:

1. That in the year 1864 the grantors and predecessors in interest of said Pacific Livestock Company acquired the right to appropriate and divert a portion of the waters of said Walker River for the irrigation of six hundred and twenty-five (625) acres of land, said portion of said waters amounting to a flow of seven and fifty one-hundredths (7.50) cubic feet per second; that in the year 1865 the grantors and predecessors in interest of said Pacific Livestock Company acquired the right to appropriate and divert a further portion of the waters of said Walker River for the irrigation of two hundred and fifty (250) additional acres of land, said further portion of said waters amounting to a flow of three (3) cubic feet per second; that in the year 1870 the grantors and predecessors in interest of said Pacific Livestock Company acquired the right to appropriate and divert a further portion of the waters of said Walker River for the irrigation of nine hundred and fifty (950) additional acres of land, said further portion of said waters amounting to a flow of eleven and forty one-hundredths (11.40) cubic feet per second; that in the year 1875 the grantors and predecessors in interest of said Pacific Livestock Company acquired the right to appropriate and divert a further portion of said waters of Walker River for the irrigation of one thousand nine hundred and fifty (1950) additional acres of land, said further portion of said waters amounting to a flow of twenty-three and forty one-hundredths (23.40) feet per second; that in the year 1880 the grantors and predecessors in interest of said Pacific Livestock Company acquired the right to appropriate and divert a further portion of the waters of said Walker River for the irrigation of two thousand six hundred and twenty (2620) additional acres of land, said further portion of said waters amounting to a flow of thirty-one and forty-four one-hundredths (31.44) cubic feet per second; that in the year 1885 the grantors and predecessors in interest of said Pacific Livestock Company acquired the right to appropriate and divert a further portion of the waters of said Walker River for the irrigation of one thousand six hundred and sixty-five (1665) additional acres of land, said further portion of said waters amounting to a flow of nineteen and ninety-eight one-hundredths (19.98) cubic feet per second; that in the year 1890 the grantors and predecessors in interest of said Pacific Livestock Company acquired the right to appropriate and divert a further portion of the waters of said Walker River for the irrigation of one thousand one hundred and sixty-five (1165) additional acres of land, said further portion of said waters amounting to a flow of thirteen and ninety-eight one-hundredths (13.98) cubic feet per second; that in the year 1895 the grantors and predecessors in interest of said Pacific Livestock Company acquired the right to appropriate and divert a further portion of the waters of said Walker River for the irrigation of seven hundred and seventy-five (775) additional acres of land, said further portion of said waters amounting to a flow of nine and thirty one-hundredths (9.30) cubic feet per second; that in the year 1900 the grantors and predecessors in interest of said Pacific Livestock Company acquired the right to appropriate and divert a further portion of the waters of said Walker River for the irrigation of one thousand five hundred (1500) additional acres of said land, said further portion of said waters amounting to a flow of eighteen (18) cubic feet per second; that in the year 1905 the grantors and predecessors in interest of said Pacific Livestock Company acquired the right to appropriate and divert a further portion of the waters of said Walker River for the irrigation of two thousand (2000) additional acres of land, said further portion of said waters amounting to a flow of twenty-four (24) cubic feet per second; that ever since said respective dates above mentioned the grantors and predecessors in interest of said Pacific Livestock Company and the said Pacific Livestock Company have appropriated and diverted said portions of the waters of said Walker River and used the same for the irrigation of the quantities of land above mentioned, and for watering live stock, and for domestic use, and the said Pacific Livestock Company is now entitled to and is the owner of said rights of appropriation and diversion of the waters of

said river, having priorities as of the respective years above mentioned, and to the extent above mentioned, said rights and priorities amounting to the aggregate flow of one hundred and sixty-two (162) cubic feet of water per second, for the irrigation of an aggregate of thirteen thousand five hundred (13,500) acres of land, and for watering live stock, and for domestic use; and the said parties of the second part, and each of them, does hereby surrender, release and confirm unto said Pacific Livestock Company, its successors and assigns, the said rights and priorities to the extent above mentioned, subject to the rights and priorities of the parties of the second part insofar as the same are found and determined in said amended findings of the said Henry Thurtell to be superior to the rights and priorities of said Pacific Livestock Company; and provided that in all cases where any of the said parties of the second part have, according to said amended findings, rights and priorities relating back to the same year to which any of the rights and priorities of said Pacific Livestock Company relate under this agreement, such rights and priorities of the respective parties shall be deemed to be equal in rank and priority; and provided further that the aforesaid surrender, release and confirmation is to take effect upon the entry of the final decree in the suit above mentioned.

2. That the water rights and priorities specified in the foregoing paragraph one of this agreement, embrace and include all of the rights, appropriations and priorities acquired by the said party of the first part up to and including the year 1905, as against the appropriations and priorities of the said parties of the second part, or any of them, anything contained in the decree of said court to be hereafter entered in said suit above mentioned to the contrary notwithstanding.

3. That said party of the first part confirms in the said parties of the second part all appropriations and priorities which the said parties of the second part are respectively found entitled to in the amended findings of the said Henry Thurtell, including the right to use any part thereof for watering live stock and domestic use, as well as for irrigation, and together with the right to conduct the water which each of said parties of the second part is respectively entitled to appropriate through any of the ditches of the parties of the second part, provided that the same can be done without interfering with the priorities of the party of the first part; the foregoing confirmation to take effect upon the entry of the final decree in the suit above mentioned. And in addition to the rights and priorities so found by the said Henry Thurtell in favor of the said parties of the second part, said parties of the second part are collectively entitled to the following further rights and priorities as against said Pacific Livestock Company in the waters of said river, to-wit, a further right and priority as of the year 1885 to appropriate and divert from said Walker River, or any of its tributaries, seven and ninety-eight one-hundredths (7.98) cubic feet of water per second for the irrigation of six hundred and sixty-five (665) acres of land; a further right and priority as of the year 1890 to appropriate and divert from said river, or any of its tributaries seven and ninety-eight one-hundredths (7.98) cubic feet of water per second for the irrigation of six hundred and sixty-five (665) acres of land; and a further right and priority as of the year 1895 to appropriate and divert from said river, or any of its tributaries, three and thirty one-hundredths (3.30) cubic feet of water per second for the irrigation of two hundred and seventy-five (275) acres of land; and the said Pacific Livestock Company does hereby surrender, release and confirm unto the said parties of the second part, their heirs, executors, administrators, assigns and successors in interest, the said additional rights and priorities to be held by them collectively. The foregoing additional allotment of water to the parties of the second part is to take effect only upon the entry of the final decree in the said suit, and thereafter said additional water allotted to said parties of the second part may be apportioned between them as they may agree, and may be used by them, or any of them, or any of their lands susceptible of irrigation from said river, or any of

its tributaries, and for watering live stock and for domestic use, due and proper regard being had to the said rights and priorities of the party of the first part, provided that none of the water shall be wasted, and that all of said water (except such portion thereof as is diverted to Patrick Gallagher, whose lands lie too low upon said Walker River to permit of its return to said river above the lands of the said party of the first part) which is not reasonably required for the irrigation of said lands, shall be returned to the said river above the lands of said Pacific Livestock Company, and that no portion of said additional water allotted shall be diverted into that certain ditch known as the Simpson Colony Ditch, unless sufficient means shall first be provided to insure the return to said river above the lands of said Pacific Livestock Company of all the water so diverted into said ditch which is not reasonably required for irrigation purposes, and the same shall be returned to the said river above the lands of the said Pacific Livestock Company; provided, that said requirement respecting said Simpson Colony Ditch shall in nowise affect the appropriations, aggregating twenty-nine and twelve one-hundredths (29.12) cubic feet of water flowing per second, found in favor of said Simpson Colony Ditch by the said Henry Thurtell in his said amended findings.

4. That those of the said parties of the second part who have heretofore been using and are now using any portion of the waters of said river, or any tributary thereof, which they are entitled to appropriate, for power purposes, may continue such use thereof, provided that sufficient means shall be maintained by them to insure the return to said river above the lands of said Pacific Livestock Company of all water not reasonably consumed in such use, and the same shall be returned to said river above the lands of said Pacific Livestock Company.

5. That the costs incurred by the protestants on the hearing of said protest, and the costs incurred by the parties of the second part in said suit to the date of this agreement, shall be borne and paid by them, and the costs incurred by said Pacific Livestock Company on said hearing, and the costs incurred by it in said suit to the date of this agreement, so far as the parties to this agreement are concerned, shall be borne and paid by it, the intent hereof being that neither party hereto shall recover from any other party hereto any costs incurred on the hearing of said protest or in said suit to the date of this agreement.

6. That upon the execution of this agreement said protest shall be formally withdrawn and dismissed by each and all of the said protestants, and said amended findings of said Henry Thurtell, after being corrected by him in the respects hereinafter mentioned, may be presented and filed by him in said court as his findings upon the issues in said suit as between all of the parties to said stipulation (including the said protestants and parties of the second part), and the final decree in said suit, so far as it concerns the rights of the parties to said stipulation (including the said protestants and parties of the second part) as between themselves and their successors in interest, shall be based upon said amended findings; provided, however, that said final decree, when entered in said suit, shall be subject, as between the parties to this agreement and their respective heirs, executors, administrators, assigns and successors in interest, to the provisions of paragraphs 1, 2, 3, and 4 of this agreement as fully as if the same were incorporated in said decree, anything contained in said decree to the contrary notwithstanding; but none of the parties to said stipulation who did not protest against the amended findings of said Henry Thurtell as to the rights and priorities of the party of the first part, shall have any benefit of advantage accruing from the provisions of this agreement; and provided further, that if any one hereinbefore named as a party of the second part shall fail or refuse to execute this agreement, this agreement shall not be of any effect as between the parties who do not execute the same unless the said protest shall be duly withdrawn and dismissed as to all those named as parties of the second part, including those failing or refusing to execute this agreement, or said party of the first part agrees in

writing that this agreement shall take effect as between it and those who do execute this agreement, and in no event shall any one named as a party of the second part, who fails or refuses to execute this agreement, have any benefit or advantage accruing from the provisions thereof.

7. That the parties executing this agreement who were not original parties to the suit above mentioned, or who did not execute this stipulation above mentioned, shall be deemed to be parties to said suit and to said stipulation, and shall be affected and controlled thereby as fully as if they were parties to said suit and had been duly served with process therein, and had executed said stipulation; and they hereby consent to be made parties to said suit at any time hereinafter, and to duly appear and answer therein whenever requested to do so by the party of the first part.

8. Said amended findings of the said Henry Thurtell shall be corrected by him in the following respects:

(*a*) The finding of priority in favor of Thomas Hall that he is entitled to appropriate and divert from the East Fork of Walker River eighteen one-hundredths (.18) cubic feet of water per second for the irrigation of eleven and one-half (11½) acres, having a priority as of the year 1901, may be corrected to read twenty-five (25) acres, forty one-hundredths (.40) cubic feet of water per second.

(*b*) John A. Rogers shall be allowed a priority as of the year 1861 for eight one-hundredths (.08) cubic feet of water per second from the West Fork of Walker River for the irrigation of five (5) acres of land.

(*c*) The finding in favor of Mrs. Adeline Hilbun shall be corrected by changing the name Spragg, Alcorn & Buley Ditch to Hilbun Ditch.

(*d*) The finding of priority in favor of Pacific Livestock Company of eight and forty one-hundredths (8.40) cubic feet of water per second for the irrigation of one hundred (100) acres of land in the year 1883 (Joggles Ditch, page 12, amended findings) shall be corrected so as to read seven hundred (700) acres, 1883, eight and forty one-hundredths (8.40) cubic feet of water per second.

(*e*) The finding of priority in favor of George S. Simpson of eighty (80) cubic feet of water per second for the irrigation of fifty (50) acres of land (page 14 amended findings) shall be changed to read eighty one-hundredths (.80) cubic feet of water per second.

(*f*) There shall be added to the findings, a finding in favor of Frank P. Shirley, successor in interest to Mary Boland-Shaw, finding that the said Frank P. Shirley is entitled to priority of appropriation of the waters of said Walker River as of the year 1898, of one and twenty-six one-hundredths (1.26) cubic feet of water per second for the irrigation of one hundred and five (105) acres of land, and to a further priority as of the year 1900, of one and eighty-six one-hundredths (1.86) cubic feet of water per second for the irrigation of one hundred and fifty-five (155) acres of land.

(*g*) The right given to Lamira Glann to take water from the Gignoux Ditch shall be cancelled.

9. This agreement shall apply to and be binding upon and inure to the benefit of the respective heirs, executors, administrators, assigns and successors in interest of the lands and water rights of the parties hereto.

IN WITNESS WHEREOF, the said corporation parties hereto have caused their respective corporate names and seals to be hereunto affixed by their respective officers thereunto duly authorized, as more fully appears from the resolutions hereto attached and made a part of this agreement, and the other parties to this agreement, and the other parties to this agreement have hereunto set their hands and seals and executed this agreement in duplicate the day and year first above written.

JAMES NICHOL.
MRS. A. R. COMPSTON.

In accordance with the foregoing agreement and request I herewith dismiss the protest against the findings in favor of the Pacific Livestock Company and present my report to the Court, this 25th day of April, 1910.

HENRY THURTELL,
Special Master in Chancery.

Thereafter the said defendant, Thomas B. Rickey, duly took and presented to the Court the testimony and evidence in support of the rights of the said Thomas B. Rickey set up in his answer to the bill of complaint and his answer to the cross-complaints herein. Thereafter the said Thomas B. Rickey, by mesne conveyances, transferred and conveyed all of his rights involved in the said action to the Antelope Valley Land & Cattle Company (a corporation), and the said corporation has been duly substituted as a party defendant in the place and stead of the said Thomas B. Rickey, and is now the owner of all the rights of the said Thomas B. Rickey involved in the said suit. After the taking of the said evidence and filing of the same in this Court, and on the 2nd day of August, 1913, all the parties to the said action entered into a stipulation and agreement in writing agreeing to the appointment of a Special Master for the purpose of fixing the rights of the said defendant, Antelope Valley Land & Cattle Company (a corporation), the said stipulation and agreement being in the words and figures following, to-wit:

MEMORANDUM OF AGREEMENT between PACIFIC LIVESTOCK COMPANY, ANTELOPE VALLEY LAND & CATTLE COMPANY, and all other parties to the suit of Pacific Livestock Company v. Thomas B. Rickey et al., in the United States District Court of the State of Nevada,

WITNESSETH:

That for the purpose of settling and adjusting the controversy in the suit above mentioned, it is by all the parties to said suit and their successors in interest stipulated and agreed as follows:

1. Rights of all parties, except Antelope Valley Land & Cattle Company, to be fixed according to Thurtell findings.

2. Rights of Antelope Valley Land & Cattle Company to be fixed as follows:

(*a*) Land irrigated and dates of irrigation, both in California and Nevada, to be in accordance with testimony already taken and the law of appropriation.

(*b*) Priority to be allowed from date of first irrigation although transfer from person first irrigating was by parol.

(*c*) Eight-tenths of a miner's inch per acre to be allowed.

(*d*) Computation of land irrigated and priorities to be determined from the testimony already taken by a person or persons to be agreed upon by the attorneys of the parties.

(*e*) Water now reservoired by Antelope Valley Land & Cattle Company above Bridgeport, during the winter or during times when all appropriations are supplied, to be used by the Antelope Valley Land & Cattle Company, but the same shall not be removed from the watershed of said river and any surplus or waste therefrom shall be returned to the river and may be used by the other parties hereto.

3. The provisions of this stipulation shall not affect or apply to any applications by any of the parties hereto to appropriate additional water for land not already irrigated now pending before the State Engineer.

4. Pacific Livestock Company and Antelope Valley Land & Cattle Company to be allowed to use the share of water belonging to the Mason ranch from the East Walker on the Bridgeport ranch and the share of the water belonging to the Mason ranch from the West Walker on the Antelope ranch if they desire to do so. Nothing herein shall affect the right of any of the parties hereto to rotate the use of water or to combine or exchange the use thereof, so far as they may do so without injuriously affecting the rights of others.

5. In case Antelope Valley Land & Cattle Company shall complete Alkali Lake Reservoir, it may take a quantity of water from the West Fork of Walker River at low stages in excess of its due proportion, but not exceeding the amount adjudged to it, provided it turns out of the reservoir at the same time a like quantity of water for the use of the other parties, which shall be

charged to the shares of stock held by said Antelope Valley Land & Cattle Co. in said reservoir.

6. In case the reservoir is built, it shall be built by a company formed by Antelope Valley Land & Cattle Company for that purpose. Such corporation shall be controlled by Antelope Valley Land & Cattle Company until said reservoir is constructed to its natural capacity and said stock paid for, and thereafter the same shall be controlled by the stockholder holding said stock. Stock shall be issued for each acre foot of storage capacity of said reservoir. Such certificates of stock may be purchased and the holder thereof may use the water represented thereby on any land he desires, and such certificates may be sold and transferred with or without the land and the land upon which the water is to be used may be changed from time to time by the holder thereof. Actual construction on said reservoir shall be commenced within one year from the date of the consent of the Government of the United States to the construction of said reservoir and the subscription to or sale of the said stock as herein provided, and shall be completed within two years thereafter to its natural capacity, and if not so commenced and completed, the parties to this agreement, other than the Pacific Livestock Company and Antelope Valley Land & Cattle Company, owning a majority of the acreage irrigated by the parties hereto may organize a company for the purpose of constructing said reservoir under the terms and conditions set forth in this agreement.

7. Such certificates shall be sold to and purchased by the parties to this suit in proportion to the amount of land irrigated by them at a price which shall equal the actual cost of said reservoir, including the land and work already done thereon and a suitable right of way for the intake from Walker River to said reservoir and an outlet from said reservoir to Walker River, which shall be valued at $75,000.00. If more land is taken than the land covered by said reservoir when filled to its natural capacity, it shall be sold by Antelope Valley Land & Cattle Company up to the embankment shown on the Hachl survey at $75.00 an acre, and the cost thereof shall be added to the cost of said reservoir. Such certificates shall be annually assessed for the actual cost of operating said reservoir. If any of said certificates are not taken by the parties to this suit within one year after the consent of the United States Government, the same shall be sold at public auction for not less than the amount aforesaid, and the moneys obtained shall be used for the payment of the construction, operation or enlargement of said reservoir.

8. All parties hereto shall use their influence in getting the consent of the Government to the use of said reservoir site.

9. All parties hereto shall use their influence in eliminating the present pending applications before the State Engineer to reservoir said water which are tying up the water, so as to make the building of the reservoir secure.

10. The water may be stored in the reservoir from November first to March first and also at any time when there is in the river a quantity of water in excess of the total amounts adjudicated to the parties hereto, and then only such excess shall be stored, and provided that water shall not be stored so as to deprive the parties of stock water, or water now in use for power purposes.

11. All water in the reservoir in excess of the amount, turned out of said reservoir to make up for the excess water diverted from the river by the Antelope Valley Land & Cattle Company, shall belong to the stockholders according to the amount of stock each shall hold in said company constructing said reservoir, subject to the provisions of paragraph five (5) hereof.

12. In the final decree in the pending suit, the Court shall appoint a suitable person, agreed to by the parties hereto, or, if they fail to agree, a party selected by the Court, to apportion the water in accordance with the decree, and shall reserve power from time to time to substitute some person in his place and his compensation shall be paid ratably by the parties hereto in proportion to the lands irrigated by said parties as set forth in said decree.

13. The parties hereto shall in some suitable way guarantee the purchase of their due proportions of said reservoir certificates whenever said Antelope

Valley Land & Cattle Company or other company heretofore mentioned is ready to proceed to construct said reservoir and payments on said certificates may be called for from time to time as the work progresses. Nothing herein shall be deemed an agreement by any party to purchase said shares, but only an option to purchase the same, nor shall it be deemed an agreement to build said reservoir, but only an option to do so in case the parties desire and are willing to subscribe to said stock, and a party may subscribe for less than his proportion of said stock if he desires.

14. Nothing in this agreement contained shall be construed so as to in any way interfere with, supersede or conflict with a former agreement made between Pacific Livestock Company and a part of the defendants in this action, as between the parties to said agreement, except such changes as are specified in paragraph four (4) of this agreement.

15. Each party hereto shall pay his own costs herein.

16. In case said reservoir, after it is first built, is enlarged, additional certificates for such additional storage capacity shall be issued and sold in the same manner and subject to the same rights and conditions.

17. In case said reservoir is built in order to determine whether Antelope Valley Land & Cattle Company is taking more water than its due proportion, the West Fork shall be measured at the Government station at the upper end of the Valley and all tributaries of said fork entering Antelope Valley below that point shall be measured and said West Fork shall also be measured above the outlet of said reservoir a sufficient distance so that said measurement would in no way be affected by water from the outlet of said reservoir, and if the due proportion of the water of said river and its tributaries at upper points belonging to the people below Antelope Valley is in the river at the lower point, then it shall be deemed that Antelope Valley Land & Cattle Company is not taking more than its due proportion of said water.

18. Nothing herein contained shall affect or impair the right of the United States Government on the Walker River Indian Reservation to any water of said river and it may, if it desires, purchase its due share of stock in the said reservoir company and its rights shall at all times be respected and preserved by said reservoir company.

19. Nothing herein shall be deemed to affect or impair any right which the Simpson Company may have acquired to water reservoired by it, in the winter or during times that all appropriations are supplied, at the head of Poor Creek, one of the tributaries of West Walker River.

20. It is further understood and agreed that that certain action brought by Rickey Land & Cattle Company in the Superior Court of Mono County, State of California, against certain of the parties hereto shall be dismissed without costs to either party.

21. This agreement shall be deemed a stipulation in the said suit of Pacific Livestock Company v. T. B. Rickey and others so far as it is material to the determination of the issues in said suit.

In Witness Whereof, the parties hereto have executed these presents as of the second day of August, 1913.

Thereafter and pursuant to the terms of the said stipulation and agreement all of the parties to the said action stipulated and agreed to the appointment of Hon. Frank H. Norcross as Special Master under the agreement and stipulation aforesaid, and thereupon an order was duly made by the said Court appointing the said Hon. Frank H. Norcross such Special Master in said cause.

Thereafter the said Hon. Frank H. Norcross, as such Special Master, duly made and filed in this cause his report and findings as such Special Master determining and fixing the rights of the said defendant, Antelope Valley Land & Cattle Company (a corporation), in and to the waters of Walker River and its tributaries, which report and findings are in the words and figures following, to-wit:

IN THE UNITED STATES DISTRICT COURT,

FOR THE DISTRICT OF NEVADA.

PACIFIC LIVESTOCK COMPANY, (a corporation), Complainant, vs. THOMAS B. RICKEY et al., Defendants.	No. 731.

SPECIAL MASTER'S REPORT.

To The Honorable, The United States District Court, for the District of Nevada:

On the 17th day of February, 1917, Hon. M. T. Dooling, District Judge, presiding, an Order of this Honorable Court was made and entered reading as follows:

> "On this day came on regularly for hearing, the motion of the complainant for the final submission of said cause, Mr. Edward F. Treadwell appearing for the complainant, Messrs. Dorsey & Henderson and W. E. Cashman for the defendant, Antelope Valley Land & Cattle Company, Messrs. Mack & Green appearing for certain defendants and S. S. Downer, Esq., appearing as attorney for certain defendants, and the said matter having been argued by counsel and submitted to the Court and the Court being now fully advised in the premises, and all parties consenting thereto, it is hereby ordered that Hon. Frank H. Norcross be, and he hereby is appointed Special Master of said Court for the purpose of ascertaining the rights of the Antelope Valley Land & Cattle Company in accordance with the stipulation of the parties to this action dated August 2nd, 1913.
>
> And it is further ordered that the compensation of the said Special Master is hereby fixed at the sum of Two Thousand ($2,000) Dollars, the same to be paid by the parties to this suit in proportion to the number of acres of land irrigated by each from the waters of Walker River as found by the finding of Henry Thurtell and as found by the said Frank H. Norcross, as Special Master.
>
> It is further ordered that the said Special Master fix and determine the manner in which the said matter shall be finally submitted to him.
>
> Done in open Court this 17th day of February, 1917.
>
> M. T. DOOLING,
> District Judge Presiding."

The Stipulation of the parties dated August 2nd, 1913, referred to in the foregoing Order, contains the following provisions relative to the manner of determining the rights of the Antelope Valley Land & Cattle Company:

> "Rights of Antelope Valley Land & Cattle Company to be fixed as follows:
>
> (*a*) Land irrigated and dates of irrigation, both in California and Nevada, to be in accordance with testimony already taken and the law of appropriation.
>
> (*b*) Priority to be allowed from date of first irrigation although transfer from person first irrigating was by parole.
>
> (*c*) Eight-tenths of a miner's inch per acre to be allowed.
>
> (*d*) Computation of land irrigated and priorities to be determined from the testimony already taken."

Pursuant to the foregoing Order and Stipulation, your Special Master proceeded to determine the water rights of the Antelope Valley Land & Cattle Company on the East Walker River in Bridgeport Valley, State of California, and upon the West Walker River in Antelope Valley in the State of California and Nevada.

On the 21st day of November, 1917, your Special Master submitted to counsel for the respective parties "Proposed Findings" as to the water rights of said company on the West Walker River in said Antelope Valley.

Thereafter, and on the 29th day of January, 1918, your Special Master

submitted "Proposed Findings" as to the water rights of said company, on the East Walker River in said Bridgeport Valley.

Thereafter, and on the 11th day of February, 1918, your Special Master mailed notices to respective counsel that he had set Saturday, March 2nd, 1918, at 2 o'clock P. M., as the time for hearing counsel relative to the Proposed Findings of water rights on the Walker River of the Antelope Valley Land & Cattle Company and that the Special Master expects all matters relative to such Proposed Findings to be finally submitted on the date specified.

Thereafter and on the 2nd day of March, 1918, at 2 o'clock P. M., at the Court Room, Department 2, Court House at Reno, Nevada, final hearing was had upon the said Proposed Findings. At such hearing the following named attorneys representing the several parties were present and participated in the hearing: Edward F. Treadwell, Esq., for the complainant, W. E. Cashman, Esq., for the defendant, Antelope Valley Land & Cattle Company, Messrs. Mack & Green, for certain defendants, S. S. Downer, Esq., for certain defendants, L. N. French, Esq., for certain defendants and William Gardiner, Esq. Mr. J. Lozano reported the proceedings. No written objections were interposed to any of the Proposed Findings, nor requests for modifications. After an informal discussion, all counsel present expressed a willingness to accept the Proposed Findings as the Findings of the Special Master without modification.

In the Proposed Findings it was pointed out that it was impossible for the Special Master to apportion priorities to the several ditches within any considerable degree of accuracy, and that, if it was desired, to have such apportionment, no other rights being interfered with, the Antelope Valley Land & Cattle Company should be permitted to designate the amount and time of appropriation which should be allowed each respective ditch, within the general totals of amounts and times of land irrigated. No request of the Special Master was made for such apportionment and the Special Master understands none such was desired, hence, no Findings in regard to particular ditches are made.

In making his Findings, for convenience of reference, the Special Master has referred to particular tracts of land embraced within certain particular land patents as delineated upon certain maps which are exhibits in the case.

For the purpose of brevity, the words, Section, Township, North Range East, Mt. Diablo Base and Meridian, are omitted, it being understood that the figures used following section subdivisions refer to the number of the Section, the Township North, and the Range, East.

FINDINGS.

Your Special Master finds that the Antelope Valley Land & Cattle Company has land and water rights as follows:

No exceptions or objections to the said report and findings of the said Special Master have been filed by any party to the said cause, and pursuant to the terms of the said stipulation and agreement the findings and report have become final.

In and by the findings of the said Henry Thurtell, the said Henry Thurtell ascertained, fixed and determined the rights of certain of the intervening defendants above named in and to the waters of Walker River and its tributaries, which persons were not at that time parties to the said action, but who nevertheless appeared before the said Henry Thurtell and submitted proof of their rights, and their rights were thereupon fixed and determined by the said Henry Thurtell and embodied in his report and findings, and the said parties have since intervened in said cause and are now parties thereto.

Fred Dill and Charles Mezger were not originally parties to said suit, but by consent of the parties thereto intervened therein and set up their rights in and to the waters of Walker River and its tributaries, and the extent of the rights of said defendants has been fixed by agreement of the parties hereto as hereinafter in this decree set forth.

The defendant, Bertrand Salles, was not a party to the said suit, but by consent of the parties thereto intervened therein and set up his rights in and to the waters of Walker River and its tributaries, and the extent of the said rights of said defendant have been settled by the agreement of the parties to this suit as hereinafter in this decree set forth.

Since the commencement of the said suit certain of the parties to the said suit have either died or transferred their rights to the defendants above named as substituted defendants, and the names of the original defendants and the names of the defendants substituted for them are as follows:

All of said substituted defendants have duly appeared herein, and said Court has jurisdiction of all of said parties.

And the complainant, Pacific Livestock Company (a corporation), having duly moved the Court to enter a final decree in the said cause upon the pleadings, stipulations, findings and reports aforesaid, and said motion coming on this day regularly to be heard, Mr. Edward F. Treadwell appearing as solicitor for the Pacific Livestock Company (a corporation), complainant, Messrs. Dorsey & Henderson and W. E. Cashman appearing as solicitor for the defendant, Antelope Valley Land & Cattle Company (a corporation), and Messrs. Cheney, Downer, Price & Hawkins, Messrs. Mack & Green, Mr. John Lothrop, Messrs. Platt & Sanford, Messrs. Ayres & Gardiner, Mr. W. W. Watson, Mr. Frank H. Norcross and Mr. Robert L. Waggoner appearing for certain of the defendants, and the said cause having been thereupon finally submitted to the Court, and the Court being fully advised in the premises,

Now Therefore, It is hereby ordered, adjudged and decreed as follows, to-wit:

1. That the parties plaintiff and defendant to this suit, or their grantors or predecessors in interest through whom they derive title, have severally and at divers times appropriated certain of the waters of Walker River, and, or, of its tributaries, and the parties hereto are severally the owners of certain rights acquired by appropriation in and to the waters of said Walker River, and, or, of its tributaries; and the amount of water so appropriated as aforesaid, the dates of appropriations fixing priorities, the lands irrigated by each of them, and for the irrigation of which lands the said waters were appropriated (to the irrigation of which lands, however, they are not to be restricted, but may use the appropriated waters elsewhere or otherwise within the limitations hereinafter prescribed), and the particular stream from which each appropriation was made are set forth in this decree by the following table in which there is separately set forth in columns reading from left to right in horizontal progression and under appropriate headings, to-wit:

(a) The name of the present owner of an existing water right.

(b) The date year when such right originally accrued under the heading "Date of relative priority".

(c) The amount of water expressed in cubic feet per second to the use of which such owner is entitled at the point of diversion under the heading "Amount in cubic feet per second".

(d) The number of acres irrigated by such water under the heading "Number of acres irrigated".

(e) The name of the stream from which the appropriation was made and from which the owner derived his right under the heading "Name of stream".

(f) The description of land by the usual abbreviations to and on which the appropriated waters have been conducted and applied for beneficial purposes under the heading "Description of land or place of use";

And all being as follows:

2. Each of the parties above named are hereby adjudged to be the owner of the flow and use of the several amounts of water appropriated by them respectively as above set forth from the stream or streams as therein set forth, and are entitled to take, divert and use the waters of the said river or the East or West Fork thereof, or of any tributary thereof as the case may be without limit as to time, method, application or use of any beneficial character whatsoever for the irrigation of land, the watering of stock, domestic uses, and other beneficial purposes, subject to and in accordance with the priorities above set forth. Wherever two or more persons are given a priority as of the same year and from the same stream, such priorities shall be deemed to be identical in point of time and equal in point of right with due regard to the amount hereby allowed to each. Any of the said parties shall be entitled to legally change the manner, means, place or purpose of use or the point of diversion of the said waters or any thereof, so far as they may do so without injury to the rights of other persons hereto, and as the same are fixed hereby, and nothing herein contained shall be deemed to in any way affect such right of change of manner, means, place or purpose of use or diversion, and the complainant may use any of the water so appropriated by it in Mason Valley for its lands in Mason Valley upon any of the lands of the Antelope Valley Land & Cattle Company situated in Antelope Valley or Bridgeport Valley under the supervision of the water commissioner. The court retains jurisdiction to hereafter render supplemental decrees in determination of controversies respecting such changes, and to tax the cost thereof as may seem to it just and equitable.

3. Each and every party to this suit, and their and each of their servants, agents and attorneys, and all persons claiming by, through or under them, and their successors and assigns in and to the water rights and lands herein described, be and each of them hereby is forever enjoined and restrained from claiming any rights in or to the waters of Walker River or its branches or channels or tributaries, except the rights set up and specified in this decree, and each of the said parties is hereby enjoined and restrained from taking, diverting or interfering in any way with the waters of the said Walker River or its branches or tributaries so as to in any way, shape or manner interfere with the diversion, enjoyment and use of the waters of any of the other parties to this suit as set forth in this decree, having due regard to the relative priorities therein set forth, and each of the said parties is hereby enjoined and restrained from ever taking, diverting, carrying away or otherwise using or claiming any of the waters so allotted to them in any manner

or at any time so as to in any way interfere with the prior rights of other parties to this suit as the same are herein set forth, or until such parties having prior rights as herein specified have received upon their several lands the waters so adjudged to them.

This decree shall be deemed to determine all of the rights of the parties to this suit in and to the waters of Walker River and its tributaries acquired or initiated in the year 1905, or at any time prior thereto, and it is hereby ordered, adjudged and decreed that none of the parties to the said suit have any right, title, interest or estate in or to the waters of the said Walker River or its branches or tributaries initiated in the year 1905 or prior thereto except as herein set forth, but nothing herein contained shall be deemed to affect any water rights acquired in and to the waters of the said river by any of the parties hereto since the year 1905, but all rights so acquired shall be subject and subordinate to the rights herein adjudicated, and all of the parties hereto are enjoined and restrained from asserting any right, title, interest or estate in and to the waters of the said river superior or prior to the rights herein set forth, and are hereby enjoined and restrained from diverting any water from the said river so as to in any manner interfere with the rights hereby adjudged. But nothing herein shall prejudice the rights of any of the parties defendant hereto under any transfer or legal succession in interest since the commencement of this suit to any of the rights hereby adjudicated to the several parties defendant.

4. The court hereby makes the following regulatory provisions for the purpose of carrying out and enforcing the provisions of this decree, to-wit:

(a) The State Engineer of the State of Nevada is hereby appointed a commissioner to apportion and distribute the waters of Walker River, its forks and tributaries, in the States of Nevada and California, in accordance with the provisions of this decree whenever complaint and application to that end shall be made to him by any one or more of the parties, their successors or assigns, so that each of such parties shall receive the part of such waters to which he is or they are entitled hereunder; that is to say:

(b) Whenever any of the parties hereto, or the successors or assigns of any such party or parties, is not receiving the amount of water to which he is or they are entitled hereunder, he or they may request the said commissioner to distribute the water in accordance with the terms of this decree, and the commissioner, either personally or by his deputy, may thereupon enter the lands of every party to this suit and shall so open, close and regulate their or any of their ditches and other works used for the diversion and application of such waters as to apportion the same as provided hereby.

(c) The said commissioner shall perform no duties hereunder except upon the complaint of some one or more of the parties to this decree or his or their successors or assigns that he is or they are not receiving the amount of water to which he is, or they are, entitled hereunder, and that some one or more of the other parties hereto is or are depriving him or them thereof.

(d) In all things relating to fixing the duties, or to the exercise of the authority of said commissioner, fixing and approving his expenses and compensation, appointing his successor or substitute in case of his death, refusal or inability to act, this court retains jurisdiction of this cause to make such order or supplementary decree as may be from time to time necessary or proper.

(e) It shall be no part of the duty of said commissioner to divide any of said waters among the stockholders of a ditch corporation to which water has been allotted by this decree, if the water which said corporation is entitled to has entered the head of its ditch.

(f) The compensation of said commissioner shall be paid ratably by all the parties to this suit in proportion to the land irrigated by said parties as set forth in this decree.

5. Nothing in this decree contained shall in any way affect or apply to any applications by any of the parties to this suit to appropriate water for

land not already irrigated now pending before the state engineer or filed with the said state engineer since the year 1905, but any rights acquired thereunder shall be subject and subordinate to the rights herein adjudged.

6. Nothing herein shall affect the right of any of the parties hereto to rotate the use of water, or to combine or exchange the use thereof, so far as they may do so without injuriously affecting the rights of any of the other parties hereto, and the said commissioner may permit the said parties to rotate the use of the said water or to combine or exchange the use thereof, having due regard to the priorities herein fixed so far as the same may be done without injuriously affecting the rights of other parties to this suit.

7. Nothing herein contained shall in any way interfere with, supersede or conflict with the said agreement made between the Pacific Live Stock Company and certain of the defendants herein, dated the 18th day of June, 1909, hereinbefore set forth, but as between the parties thereto the same shall be binding upon them, and shall modify their rights to the extent therein set forth, and the said rights specified in the said contract as between the parties thereto are hereby fixed in accordance with the said contract, and as between the parties to the said contract the said commissioner shall apportion the said water in the manner hereinbefore stated, but subject to the terms of the said contract.

8. Nothing herein contained shall be deemed to in any way change or affect the provisions of the said contract dated August 2nd, 1913, by and between the parties to this suit, but the rights herein adjudged are adjudged subject to the provisions of the said contract, and particularly to the following provisions thereof:

1. The water now and heretofore reservoired by the Antelope Valley Land & Cattle Company in the several tributaries of Walker River situated above Bridgeport during the winter, or during times when all appropriations herein set forth are supplied, may be used by the Antelope Valley Land & Cattle Company in Bridgeport Valley irrespective of any of the priorities herein set forth, but the same shall not be removed from the watershed of the said river and any surplus or waste therefrom shall be returned to the river, and may be used by the other parties hereto in accordance with their several priorities in and to the waters of said river.

2. In case the said Antelope Valley Land & Cattle Company shall complete the Alkali Lake Reservoir, it may take a quantity of water from the West Fork of Walker River at low stages in excess of its due proportion in view of the priorities herein adjudged, but not exceeding the total amount adjudged to it by this decree, providing it turns out of the said reservoir at the same time and as a substitute therefor a like quantity of water out of its share of said waters for use by the other parties hereto, and which shall be used by them as a part of the river flow in accordance with their relative priorities as herein established.

3. In case the said Alkali Lake Reservoir is built as provided in the said agreement, water may be stored in the same from the first of November to the first of March irrespective of any of the rights and priorities hereby adjudged and fixed, and may also be stored at any time when there is in the river a quantity of water in excess of the total amounts adjudicated to the parties hereto, to the extent of such excess, but water shall not be stored in the said reservoir so as to deprive the parties hereto of stock water or water now in use for power purposes.

4. All water so reservoired in excess of the amount turned out of said reservoir to make up for the excess water diverted from the river by the Antelope Valley Land & Cattle Company as aforesaid, shall belong to the stockholders in the corporation constructing said reservoir according to the amount of stock each shall hold in the company constructing the said reservoir, subject to the right of the parties hereto to receive from the said reservoir a quantity of water equal to the excess water so used by the Antelope Valley Land & Cattle Company as aforesaid.

5. In case the said reservoir is built, then in order to determine whether the Antelope Valley Land & Cattle Company is taking more water than its due proportion, the West Fork shall be measured at the Government station at the upper end of Antelope Valley, and all tributaries of said West Fork entering Antelope Valley below that point shall be measured, and said West Fork shall also be measured above the outlet of said reservoir a sufficient distance so that said measurement would in no way be affected by water from the outlet of said reservoir, and if the due proportion of the water of said river and its tributaries at the upper points belonging to the parties hereto below Antelope Valley is in the river at the lower point, then it shall be deemed that the Antelope Valley Land & Cattle Company is not taking more than its due proportion of said water.

6. Nothing herein shall be deemed to affect or impair the right which the Simpson Company may have acquired to water reservoired by it in the winter or during times when all appropriations are supplied at the head of Poor Creek, one of the tributaries of Walker River. The defendant, Frank W. Simpson, successor in interest of the Simpson Company (a corporation) and Frank Simpson, is the owner of certain land situated in Bridgeport Valley, Mono County, State of California, and the water rights of said lands were set up in the answers of said defendants but were not fixed or determined by the findings of the said Henry Thurtell, and it has been stipulated by the parties that this decree need not fix or determine such rights, but in case they are determined in any subsequent case the same shall be determined in accordance with the law of appropriation and in the same manner as if they had been determined in this suit, and the said defendant shall not rely upon any Statute of Limitations which he could not have relied upon if the same had been determined in this suit, and the judgment herein shall not be deemed to in any way determine or affect said rights.

9. Each of the parties to this suit shall severally pay their own costs therein expended.

Done in open court this 22 day of March, 1919.
