Remarks:

This spring was first used by Charles H.Odgers in 1900 for watering his sheep and cattle and who sold his range and land to Casten Olsen, who sold it to this claimant in 1906, and these springs have been used by the claimant exclusively ever since for watering his sheep.

Each year the claimant has cleaned out the spring and reservoir and improved the same so as to make it a better place and better suited for the purpose of watering his sheep.

This is one of a series of springs so small that none of them are sufficient to water a large herd of sheep, but by combining them and ranging the sheep from one to the other, a sufficient quantity of water can be secured to water a good sized herd.
