APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit to change the point of diversion of a portion of the waters of an underground source as heretofore granted under Permit No. 15402, is issued subject to the terms and conditions imposed in said Permit No. 15402 and with the understanding that no other rights on the source will be affected by the change proposed herein. If the well is flowing, a valve must be installed and maintained to prevent waste. A Parshall flume must be installed at or near the new point of diversion to facilitate the measurement of water. It is understood that this right must allow for a reasonable lowering of the static water level at permittees well due to other ground water development in the area. This source is located within an area designated by the State Engineer pursuant to NRS 534.030; therefore the State retains the right to regulate the use of the water herein granted at any and all times.

The amount of water to be changed shall be limited to the amount which can be applied to beneficial use, and not to exceed 1.5 cubic feet per second, or a yearly duty of 5.0 acre-feet per acre of land irrigated.

Actual construction work shall begin on or before March 1, 1960

Proof of commencement of work shall be filed before April 1, 1960

Work must be prosecuted with reasonable diligence and be completed on or before March 1, 1961

Proof of completion of work shall be filed before April 1, 1961

Application of water to beneficial use shall be made on or before March 1, 1962

Proof of the application of water to beneficial use shall be filed on or before April 1, 1962

Map in support of proof of beneficial use shall be filed on or before

Commencement of work filed OCT 19 1960

Completion of work filed DEC 5 1960
