EXHIBIT A 2/26/2016

The proximity of this well will effect my own well (LOG # 10707) along with my irrigation well (permitt # 18676) which has dropped drastically from your report in November of 2015 it measured a water level of 35 Ft the reading in March of 2015 read a level at 28 Ft. I feel anyother well in this area will have a drastic effect on both my wells along with a well from the ranch I lease (permit # 19873) With four new wells being allowed in the last four years (two of O-N's,Peri & Sons,and Bitler Farms) I don't think the water level can withstand another well in this general area. With the lack of man power in your office I can't see you checking pumping rates.

I'm a small family own ranch I can't afford the expense of drilling of new wells. Also I point out that this well has been split once before(permit# 30259) I oppose the application for water # 85778 and 85779 or any new wells in this area.

Thank you for your consideration

David Giorgi DBA G Lazy B Partnership
