THE STATE OF NEVADA

PERMIT TO CHANGE POINT OF DIVERSION, MANNER OF USE AND PLACE OF USE OF THE PUBLIC WATERS OF THE STATE OF NEVADA HERETOFORE APPROPRIATED

Name of applicant:	**REDROCK VALLEY RANCH, LLC**
Source:	**UNDERGROUND**
Basin:	**RED ROCK VALLEY**
Manner of Use:	**MUNICIPAL**
Period of Use:	**January 1st to December 31st**
Priority Date:	**01/30/1975**

****

APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit to change the place and manner of use of a portion of the waters of an underground source as heretofore granted under Permit 29181, Certificate 11619, is issued subject to the terms and conditions imposed in said Permit 29181, Certificate 11619 and with the understanding that no other rights on the source will be affected by the change proposed herein. The well shall be equipped with a 2-inch opening and a totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of the water begins or before the proof of completion of work is filed. If the well is flowing, a valve must be installed and maintained to prevent waste. This source is located within an area designated by the State Engineer pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

Monthly records shall be kept of the amount of water pumped from this well and the records submitted to the State Engineer on an annual basis within 30 days after the end of each calendar year.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The total combined duty of water under Permits 73960, 73961, 73962, 73963 and 73965 shall not exceed 484 acre-feet annually.

The total combined duty of water under Permits 73960, 73961, 73962, 73963, 73965, 73966 and 74368 shall not exceed 1,273 acre-feet annually.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

The issuance of this permit is for the consumptive use portion only, being 374 acre-feet, of the 598.4 acre-feet portion of the base right. The remainder, 224.4 acre-feet, remains in the groundwater source. The issuance of this permit abrogates 598.4 acre-feet from Permit 29181, Certificate 11619.

As provided in State Engineer's Ruling No. 5816, dated January 15, 2008, a monitoring and mitigation plan must be developed and submitted to the State Engineer for approval prior to the diversion of any water authorized under this permit. Upon approval of the plan, the permittee is required to submit an annual report of the monitoring results. Upon review of the monitoring results, the State Engineer retains the right to reduce the pumping from this well, or to take appropriate action to protect the public interest or to prevent conflict with prior existing rights or domestic wells. If unreasonable impacts to existing rights or domestic wells are demonstrated, the permittee will be required to mitigate the same.

As provided in Ruling No. 5816, the total combined duty of water initially allowed to be pumped under Permits 73960, 73961, 73962, 73963, 73965, 73966 and 74368 is limited to 855 acre-feet annually until such time as the conditions set forth in Option 1 or Option 2 under Finding XVI of the Ruling are met and the State Engineer determines that an additional amount up to 418 acre-feet annually of water under these subject permits can be pumped.

(Continued on Page 2)

The point of diversion and place of use are as described on the submitted application to support this permit.

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, **and not to exceed 2.236 cubic feet per second or 374 acre-feet annually.**

Work must be prosecuted with reasonable diligence and proof of completion of work shall be filed on or before: **May 30 , 2013**

Water must be placed to beneficial use and proof of the application of water to beneficial use shall be filed on or before: **May 30 , 2018**

Map in support of proof of beneficial use shall be filed on or before: **N/A**

IN TESTIMONY WHEREOF, I, TRACY TAYLOR, P.E.,

State Engineer of Nevada, have hereunto set my hand and the seal of my office, this 30th day of **May**, A.D. **2008**

The applicant **Redrock Valley Ranch, LLC** hereby makes application for permission to change the **Place and Manner of Use of a portion** water heretofore appropriated under **Permit No. 29181, Certificate No. 11619**

****

1. The source of water is **underground**

2. The amount of water to be changed **2.236 cfs, 598.40 acre feet annually**

3. The water to be used for **Municipal and domestic**

4 The water heretofore permitted for **Irrigation & domestic**

5 The water is to be diverted at the following point **within the NW¼ of the SW¼ of Section 12, T.23N., R.18E., M.D.M., or at a point from which the west ¼ corner of said Section 12 bears North 46° 24' 09" West a distance of 967.20 feet. See map supporting Permit No. 29181.**

6. The existing permitted point of diversion is located within **(point of diversion is not changed)**

7. Proposed place of use **Please see attached Exhibit "A".**

8. Existing place of use **39.6 acres within the SE¼ NE¼ and 39.0 acres within the NE¼ SE¼ of Section 11; 40.0 acres within the SW¼ NW¼ and 31.0 acres within the NW¼ SW¼ of Section 12, all in T.23N., R.18E., M.D.M.. All of the certificated place of use within Washoe County Assessor's Parcel No. 078-194-06, excepting Areas A & B as shown on the map that accompanied Application No. 71746.**

9. Use will be from **January 1** to **December 31** of each year.

10. Use was permitted from **January 1** to **December 31** of each year.

11. Description of proposed works **Water will be diverted by pipeline to existing T.M.W.A. facilities, treated and placed into the existing distribution system.**

12. Estimated cost of works **$5,000,000.00**

13. Estimated time required to construct works **3 years**

14. Estimated time required to complete the application of water to beneficial use **10 years**

73960

15. Remarks: **Water will be pumped treated and delivered from Basin 99 by pipeline to TMWA's water distribution system in Stead to be used within the proposed place of use described in Item No. 7.**
