APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit to change the point of diversion and place of use of the waters of an underground source as heretofore granted under Permit 73292 is issued subject to the terms and conditions imposed in said Permit 73292 and with the understanding that no other rights on the source will be affected by the change proposed herein. The well shall be equipped with a 2-inch opening and a totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of the water begins or before the proof of completion of work is filed. If the well is flowing, a valve must be installed and maintained to prevent waste. This source is located within an area designated by the State Engineer pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

The permittee shall keep monthly records of the amount of water pumped from this well and the records must be submitted to the State Engineer on an annual basis within 30 days after the end of each calendar year.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The total combined duty of water under Permits 62484, 62485 and 77672, having the same Point of Diversion, shall not exceed 0.045 cubic feet per second and 12.17 acre-feet annually.

The total combined duty of water under Permits 55391 (revocable), 62484, 62485 and 77672, having mixed separate and overlapping (commingled) places of use, shall not exceed 15.52 acre-feet annually.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

(Continued on Page 2)

If any water under this permit is cancelled, withdrawn, or any water is not put to beneficial use, it will revert to the groundwater source and not back to the base water right.

Permit 77672 is issued for commercial purposes on the parcel identified by the Clark County Assessor as the 18.22 acre APN 191-17-501-005.

The point of diversion and place of use are as described on the submitted application to support this permit.

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, **and not to exceed 0.014 cubic feet per second or 3.0 acre-feet annually.**

Work must be prosecuted with reasonable diligence and proof of completion of work shall be filed on or before: **September 21, 2010**

Water must be placed to beneficial use and proof of the application of water to beneficial use shall be filed on or before: **September 21, 2011**

Map in support of proof of beneficial use shall be filed on or before: **September 21, 2011**

IN TESTIMONY WHEREOF, I, TRACY TAYLOR, P.E.,

State Engineer of Nevada, have hereunto set my hand and the seal of my office, this 21st day of **September,** A.D. **2009**
