APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit to change the point of diversion and place of use of a portion of the waters of an underground source as heretofore granted under Permit 71770, Certificate 17036 is issued subject to the terms and conditions imposed in said Permit 71770, Certificate 17036 and with the understanding that no other rights on the source will be affected by the change proposed herein. This well shall be equipped with a two (2) inch opening for measuring depth to water and a totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of the water begins or before the proof of completion of work is filed. If the well is flowing, a valve must be installed and maintained to prevent waste. This source is located within an area designated by the State Engineer pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The total combined duty of water under Permits 70156 and 81100 shall not exceed 2.00 acre-feet annually.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

If any water under this permit is cancelled or any water is not put to beneficial use, it will revert to the groundwater source and not back to the base water right.

This permit is issued for irrigation and domestic purposes within the described place of use, further identified by the Clark County Assessor APN 126-36-501-004.

The point of diversion and place of use are as described on the submitted application to support this permit.

(Continued on Page 2)

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, **and not to exceed 0.0016 cubic feet per second or 1.0 acre-feet annually**.

Work must be prosecuted with reasonable diligence and proof of completion of work shall be filed on or before: **April 25 2013**
Water must be placed to beneficial use and proof of the application of water to beneficial use shall be filed on or before: **April 25 2015**
Map in support of proof of beneficial use shall be filed on or before: **April 25 2015**

IN TESTIMONY WHEREOF, I, JASON KING, P.E.,

State Engineer of Nevada, have hereunto set my hand and the seal of my office, this 25th day of **April**, A.D. **2012**

13. Estimated time required to construct works three years

If well completed, describe well.

14. Estimated time required to complete the application of water to beneficial use seven years

15. Provide a detailed description of the proposed project and its water usage (use attachments if necessary): (Failure to provide a detailed description may cause a delay in processing.)

Clark County Assessor Parcel No. 126-36-501-001 (also known as 5575 Michelli Crest Way, Las Vegas, Nevada) (the "Lot") was historically intended to have water service under Permit Non. 55690, which was cancelled. This application is being filed in order to locate water rights appurtenant to the Lot. These water rights will provide irrigation and domestic water service for a single family home to be constructed on the Lot.

16. Miscellaneous remarks:

Permit No. 71770 was intended to provide water service to Clark County Assessor Parcel No. 163-12-601-003. This property is no longer planned for residential development. No Stripping Map will be necessary since the current place of use is now occupied by a school and is no longer being irrigated.
