APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This temporary geothermal permit, to change the point of diversion and place of use of the waters of an underground geothermal source as heretofore granted under Permit 76198, is issued subject to the terms and conditions imposed in said Permit 76198. No other rights on the source are affected by the change proposed herein.

It is also understood that this right must allow for a reasonable decrease in reservoir pressure and heat. The well shall be constructed and maintained to prevent any waste of the geothermal fluid above or below the surface. The producing well discharge shall be closely monitored and recorded. Only geothermal waters are to be diverted under this geothermal permit.

This temporary geothermal permit allows for a total consumptive use of the geothermal fluid not to exceed 473.31 acre-feet per season. The State Engineer reserves the right to make findings regarding the consumptive use of the geothermal fluid and impose additional conditions thereto.

This temporary geothermal permit is issued with the understanding that the Monitoring Plan, which is Exhibit A of the Stipulation dated June 21, 1996, by and between Brady Power Partners and Gilroy Foods Inc. will continue to be implemented. Any modifications of the reservoir-monitoring program shall be approved by the State Engineer, the Nevada Division of Minerals and the Nevada Division of Environmental Protection.

The Permittee shall keep monthly records of the amount of water discharged to waste and the records must be submitted to the State Engineer within 30 days after the expiration of this Temporary Permit.

This temporary geothermal permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The total combined withdrawal and consumptive use of geothermal fluid under Temporary Geothermal Permits 82537T, 82538T, 82539T, 82540T, 82541T and 82542T, having the same place of use, shall not exceed 1,016.31 acre-feet per season of which 543 acre-feet may be used on an annual basis.

(Continued on Page 2)

The issuance of this temporary geothermal permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

This temporary geothermal permit will expire on **December 10, 2013**, at which time all rights herein granted shall revert to the right being changed by this temporary permit.

The point of diversion and place of use are as described on the submitted application to support this permit.

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, **and not to exceed 1.56 cubic feet per second or 473.31 acre-feet per season**.

Work must be prosecuted with reasonable diligence and proof of completion of work shall be filed on or before:	**N/A**
Water must be placed to beneficial use and proof of the application of water to beneficial use shall be filed on or before:	**N/A**
Map in support of proof of beneficial use shall be filed on or before:	**N/A**

IN TESTIMONY WHEREOF, I, JASON KING, P.E.,

State Engineer of Nevada, have hereunto set my hand and the seal of my office, this 24th day of **April, 2013**
