Permit No. 82737

THE STATE OF NEVADA

PERMIT TO APPROPRIATE WATER

Name of Permittee:	**LIND RANCHES, LC**
Source:	**UNDERGROUND**
Basin:	**RUBY VALLEY**
Manner of Use:	**IRRIGATION**
Period of Use:	**JANUARY 1ST THROUGH DECEMBER 31ST**
Priority Date:	**04/22/2013**

****

APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit is issued subject to existing rights. It is understood that the amount of water herein granted is only a temporary allowance and that the final water right obtained under this permit will be dependent upon the amount of water actually placed to beneficial use. It is also understood that this right must allow for a reasonable lowering of the static water level. This well shall be equipped with a two (2) inch opening for measuring depth to water. If the well is flowing, a valve must be installed and maintained to prevent waste. A totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of water begins, or before the Proof of Completion of Work is filed. This source is located within an area designated by the State Engineer, pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The well must be sealed with cement grout, concrete grout or neat cement from ground level to 100 feet.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

This permit is issued supplemental to surface water rights from Thompson Creek under Proof of Appropriation V04698. Surface water must be used prior to using water under this underground right.

The point of diversion and place of use are as described on the submitted application to support this permit.

(Continued on Page 2)

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, **and not to exceed 2.5 cubic feet per second or 520.0 acre-feet annually and not to exceed 4.0 acre-feet per acre from all sources.**

Work must be prosecuted with reasonable diligence and proof of completion of work shall be filed on or before:	**August 29 2015**
Water must be placed to beneficial use and proof of the application of water to beneficial use shall be filed on or before:	**August 29 2018**
Map in support of proof of beneficial use shall be filed on or before:	**August 29 2018**

IN TESTIMONY WHEREOF, I, JASON KING, P.E.,

State Engineer of Nevada, have hereunto set my hand and the seal of my office, this 29th day of **August, 2013**

P.E.

State Engineer

Application No. 82737

APPLICATION FOR PERMIT TO APPROPRIATE THE PUBLIC WATERS OF THE STATE OF NEVADA

THIS SPACE FOR. OFFICE USE ONLY

Date of filing in State Engineer's Office APR 2 2 2013

Returned to applicant for correction _____

Corrected application filed _____ Map filed APR 2 2 2013

The applicant Lind Ranches, LC

HC 60 Box 611 (Street Address Or P.O. Box) of Ruby Valley (City or Town)

Nevada, 89833 (State and Zip code No.) hereby make(s) application for permission to appropriate the public waters of the State of Nevada, as hereinafter stated. (If applicant is a corporation, give date and place of incorporation; if a copartnership or association give names of members.)

December 26, 1996 in Utah

1. The source of water is Underground (Name of stream, lake, underground, spring or other sources)
2. The amount of water applied for is 2.50 cfs second feet. (One second foot equals 448.83 gallons per minute.)
   (a) If stored in reservoir give number of acre-feet _____
3. The water to be used for Irrigation (Irrigation, power, mining, commercial, domestic or other use. Must limit to one major use.)
4. If use is for:
   (a) Irrigation, state number of acres to be irrigated 130.00 acres
   (b) Stockwater, state number and kind of animals _____
   (c) Other use (describe fully in No. 12) _____
   (d) Power:
      (1) Horsepower developed _____
      (2) Point of return of water to stream _____

Ruby Valley
10-176
Elko

5. The water is to be diverted from its source at the following point: (Describe as being within a 40-acre subdivision of public survey, and by course and distance to a found section corner. If on unsurveyed land, it should be so stated.)

SW1/4 NW1/4 of Section 22, T.31 N., R.59 E., M.D.B. & M., at a point from which the West 1/4 Corner of said Section 22, bears S 38° 28' 24" W, 1457.92 feet.

6. Place of use (Describe by legal subdivision. If on unsurveyed land, it should be so stated)

Portions of the S1/2 NW1/4 and portions of the SW1/4 of Section 22, T.31 N., R.59 E., M.D.B. & M.

7. Use will begin about January 1st (Month and Day) and end about December 31st (Month and Day) of each year.

8. Description of proposed works (Under the provisions of NRS 535.010 you may be required to submit plans and specifications of your diversion or storage works.) (State manner in which water is to be diverted, i.e. diversion structure, ditches and flumes, drilled well with pump and motor, etc.)

Drilled well, pump, pipelines and pivot sprinkler system.

9. Estimated cost of works: $10,000

10. Estimated time required to construct works: 3 years (If well completed, describe works.)

11. Estimated time required to complete the application of water to beneficial use 5 years

12. Provide a detailed description of the proposed project and its water usage (use attachments if necessary): (Failure to provide a detailed description may cause a delay in processing.)

Drilled well, pipelines and pivot sprinkler system to irrigate 130.00 acres within the proposed place of use.

13. Miscellaneous remarks:

The waters under this application are to be supplemental to the waters from Thompson Creek claimed under Proof of Appropriation V-04698. The acreage and area being applied for have previously been irrigated by a pivot sprinkler served by the waters from Thompson Creek. Due to the drought conditions the past two years, the waters from Thompson Creek have not been sufficient in quantity to irrigate this area. We are filing this application for supplemental underground waters due to the fact that without an alternate water source for the crops raised on the lands being applied for, the applicant has indicated it will be necessary for him to sell a large number of cattle due to lack of feed.
