Exhibit C

Item No. 16. Miscellaneous remarks:

Since obtaining its existing water rights, Applicant has undergone several expansion projects and currently is in the process of permitting an additional expansion project. Within the proposed expansion project, Applicant intends to expand the North Operation Area (NOA) Project. This expansion will include further development of mine facilities within the existing NOA, inclusion and expansion of the Casino/Winrock mine facilities, and inclusion and reactivation of the previously reclaimed White Pine Mine area. Additionally, Applicant intends to expand the South Operations Area (SOA) project, which includes expanding the existing Yankee Mine and reclaimed Alligator Ridge Mine facilities and constructing a transportation utility corridor between the NOA and SOA projects.

The purpose of this change application is to expand the place of use so that previously permitted water diverted under this application may be used anywhere within Applicant's current and anticipated future operations. This application is being filed simultaneously with applications to change Applicant's other existing mining, milling, and domestic water rights to commingle and consolidate its water rights within one place of use.
