Permit No. 85063T

TEMPORARY

THE STATE OF NEVADA

PERMIT TO CHANGE THE PUBLIC WATERS OF THE STATE OF NEVADA HERETOFORE APPROPRIATED

Name of Permittee:	**FLT TRUST**
Source:	**UNDERGROUND**
Basin:	**WINNEMUCCA SEGMENT**
Manner of Use:	**IRRIGATION**
Period of Use:	**AS DECREED**
Priority Date:	**06/07/1976**

****

APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This temporary permit, to change the place of use of the waters of an underground source as heretofore granted under Permit 30316, Certificate 9221, is issued subject to the terms and conditions imposed in said Permit 30316, Certificate 9221 and with the understanding that no other rights on the source will be affected by the change proposed herein. This well shall be equipped with a two (2) inch opening for measuring depth to water. A totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of the water begins or before the proof of completion of work is filed. If the well is flowing, a valve must be installed and maintained to prevent waste. This source is located within an area designated by the State Engineer pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

Temporary Permits 85058T through 85065T, 85078T and 85155T shall be limited to 6,040.41 acre-feet per season strictly from surface water sources, 3,010.38 acre-feet per season from supplemental underground sources, and 67.24 acre-feet per season from non-supplemental underground sources for a total combined duty from all sources not to exceed 6,107.65 acre-feet per season.

The total combined duty from underground sources shall not exceed 3,077.62 acre-feet per season.

Temporary Permits 85058T through 85065T, 85078T and 85155T shall be limited to 1,754.1 acres strictly from surface water sources, plus 1,003.46 acres from supplemental underground and surface water sources, plus 22.6 acres from non-supplemental underground sources, for a total of 2,780.16 acres irrigated from all sources within the common place of use described in the applications.

This temporary permit is issued pursuant to the provisions of NRS 533.345 Section 2 and will expire at the end of the irrigation season as decreed or October 31, 2015, whichever is sooner, at which time all rights herein granted shall revert to the right being changed by this temporary permit.

(Continued on Page 2)

This temporary permit, for underground water, is partially supplemental to lands having decreed surface water. This underground water is to be used to the extent that this surface water is not available. The permit holder is responsible for insuring delivery of the surface water to those lands within the place of use. Any time that this decreed land is in priority, the underground water under this permit shall not be diverted to this land. The total diversion of water used for irrigation purposes from all sources shall not exceed the duty of water for this place of use as set forth in the Humboldt River Decree.

Any replacement well must be sealed from ground level to 100 feet in accordance with NAC 534.380.

This temporary permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The issuance of this temporary permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

The point of diversion and place of use are as described on the submitted application to support this permit.

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, **and not to exceed 3.4 cubic feet per second or 600.0 acre-feet annually, but not to exceed 3.0 acre-feet per acre from all sources.**

Work must be prosecuted with reasonable diligence and proof of completion of work shall be filed on or before: **N/A**

Water must be placed to beneficial use and proof of the application of water to beneficial use shall be filed on or before: **N/A**

Map in support of proof of beneficial use shall be filed on or before: **N/A**

IN TESTIMONY WHEREOF, I, JASON KING, P.E.,

State Engineer of Nevada, have hereunto set my hand and the seal of my office, this 4th day of **June, 2015**

P.E.

State Engineer

TEMPORARY Application No. 85063 T

APPLICATION FOR PERMISSION TO CHANGE POINT OF DIVERSION, MANNER OF USE AND PLACE OF USE OF THE PUBLIC WATERS OF THE STATE OF NEVADA HERETOFORE APPROPRIATED

THIS SPACE FOR OFFICE USE ONLY

Date of filing in State Engineer's Office APR 0 9 2015

Returned to applicant for correction

Corrected application filed Map filed Jun 7 1976 under 30316

The applicant FLT Trust

2620 South Maryland Parkway (Street Address or PO Box) of Las Vegas (City or Town)

Nevada 89109 (State and ZIP Code) hereby make(s) application for permission to change the

☐ Point of diversion ☑ Place of use ☐ Manner of use ☐ of a portion

of water heretofore appropriated under (Identify existing rights by Permit, Certificate, Proof or Claim Nos. If Decreed, give title of Decree and identify right in Decree.)

Permit 30316, Certificate 9221

1. The source of water is Underground
   Name of stream, lake, underground, spring or other sources.

2. The amount of water to be changed 3.4 cfs but not to exceed 600 acre-feet per season
   Second feet, acre-feet. One second foot equals 448.83 gallons per minute.

3. The water to be used for Irrigation
   Irrigation, power, mining, commercial, etc. If for stock, state number and kind of animals. Must limit to one major use

4. The water heretofore used for Irrigation
   If for stock, state number and kind of animals.

5. The water is to be diverted at the following point (Describe as being within a 40-acre subdivision of public survey and by course and distance to a found section corner. If on unsurveyed land, it should be stated.)

   WITHIN THE SW¼ NW¼ OF SECTION 29, T. 36 N., R. 40 E., M.D.B.&M., OR AT A POINT FROM WHICH THE SW CORNER OF SAID SECTION 29, BEARS S. 9° 7' W., A DISTANCE OF 3,624 FEET.

6. The existing point of diversion is located within (If point of diversion is not changed, do not answer.)

70-40

7. Proposed place of use (Describe by legal subdivisions. If for irrigation, state number of acres to be irrigated.)

See Attached

8. Existing place of use (Describe by legal subdivisions. If changing place of use and/or manner of use of irrigation permit, describe acreage to be removed from irrigation.)

See Attached

9. Proposed use will be from January 1st (Month and Day) to December 31st (Month and Day) of each year.

10. Existing use permitted from January 1st (Month and Day) to December 31st (Month and Day) of each year.

11. Description of proposed works. (Under the provision of NRS 535.010 you may be required to submit plans and specifications of your diversion or storage works.) (State manner in which water is to be diverted, i.e., diversion structure, ditches, pipes and flumes or drilled well, pump and motor, etc.)

Existing well, pump, and irrigation system under Permit 30316, Certificate 9221

12. Estimated cost of works $0

13. Estimated time required to construct works Cased 16" well, 256 ft. deep
(If well completed, describe well.)

14. Estimated time required to complete the application of water to beneficial use 1 year

15. Provide a detailed description of the proposed project and its water usage (use attachments if necessary): (Failure to provide a detailed description may cause a delay in processing.)

In an effort to improve the irrigation efficiency of the ranch, a modernized pivot irrigation system was installed over areas that were previously flood irrigated. This application proposes to change the place of use of existing water rights as a result of the new irrigation practice. A total of 200 irrigated acres will be moved to the proposed place of use.
