State of Nevada,
County of Elko } ss.

I, Geo A Henry, being duly sworn deposes and says that the above map is a true and correct plat of the lands irrigated by Henry E. Thompson as taken from the field notes of a survey made by me, completed on the 9th day of June, 1914. That the map and survey were made at the instance of Henry E Thompson, owner of said lands, and that it truly represents the irrigated lands of said Henry E. Thompson.

Geo A Henry, Surveyor.

Subscribed and sworn to before me this 18 day of June, 1914.

John G. Olson
Notary Public in and for Elko County
State of Nevada.
My commission expires January 20th 1916

Surveyor's Notes

The small water flow emanating from Spring No 1. shows its beginning in the extreme north-east corner of the N-E¼ of the N-E¼ of Section 36, Township 27, Range 64, East. By reason of the foot hills commencing their ascent from this point to the west and north-west the water flow naturally runs to the east and south-east through the low depression as indicated on map. The source from which a very inferior water flow is derived is from Spring No. 2. or a bog with a radius of about five acres. This depression occurring in the S-E¼ of the N-E¼ (same section) about 350 feet west of Mr. Thompson's entry. The water secured from drain ditches passes through the bog ground into the S½ of the N-N¼ of Section 31, Township 28, Range 64, East at a point 350 feet north of Mr. Thompson's south-west corner.

If Mr. Thompson can develop enough water to cultivate forty acres of his land by draining the bog ground hereon described it will, by strenuous labor, the labor he has already performed deserves reward.
