REMARKS

This application covers 416.26 acres of ground with a decreed water right in the Bartlett Decree under Proof No. 00157. Proof No. 00157 is broken down as follows: Meadow pasture 165.28 acres and diversified pasture 250.98 acres.

This application covers 640 acres of ground which is an additional acreage of 224 acres to the amount of ground given a water right in the Bartlett decree under Proof No. 00157.

The application up grades the water right for meadow pasture and diversified pasture of Proof No. 00157 to 3 acre feet thus making it possible to develop this ground to a harvest type of culture. It also increases the acreage irrigated under Proof No. 00157 by 224 acres which will be a harvest type of culture requiring 3 acre feet per acre.

Ground under Proof No. 00157 is decreed a water right in the amount of 436 acre feet. This application is for an additional 1,482 acre feet which allows the total acreage of 640 acres covered by the application to be developed into a harvest type of culture.

The application is for an irrigation flow for the entire 640 acres covered by the application of 6 c.f.s. per 100 acres of ground to be irrigated. Because of the type of ground and the characteristic flow of the Humboldt River and its tributaries the most economical head for good husbandry is 6 c.f.s. per 100 acres.

The intent of this application is to appropriate 1,482 acre feet of the surplus waters of the Humboldt River. Surplus water being considered the water above the 100% decreed flow of all the prior decreed and permitted rights on the Humboldt River system to this application.
