The actual amount changed under said application was 8 miner's inches, however, the area should have been 15.5 acres and the duty of 62 acre feet. This application is changing 17 miner's inches or 132 acre feet from 33 acres. In order to clarify and correct Serial No. 24419, an additional 45.5 acre feet is being added to this application. The total amount of water to be changed is 25 inches or 194 acre feet. Compared jls/kjm hs/jw Applicant William Shay The discrepancy resulted from stock water and non-stock or surplus water, which has no bearing on the decreed water of 25 inches.
