I, Frederick Davis, being first duly sworn, deposes and says, that the above is a true and accurate plat of the sources of the Nevada Bunker Hill Mining Co. water supply for domestic use and for cooling gas engines etc, as taken from field notes of a survey made by me on July 30th 1917. That the map was made at the instance of the Board of Directors of said Company, and it truly represents the location of the springs developed by it, and the pipe lines therefrom.
That springs designated as Nos 2 and 3 on above map are in fact a continuation of the water from spring No 1 along a porphyry and limestone contact.

Fred Davis. C.E.
Surveyor.
