APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit is issued subject to all existing rights on the source. It is understood that the amount of water herein granted is only a temporary allowance and that the final water right obtained under this permit will be dependent upon the amount of water actually placed to beneficial use. It is also understood that this right must allow for a reasonable lowering of the static water level at permittee's well due to other ground water development in the area. A measuring device must be installed and measurements of water use kept. The well shall be equipped with a 2-inch opening for measuring depth to water. If the well is flowing, a valve must be installed and maintained to prevent waste. The State retains the right to regulate the use of the water granted herein at any and all times.
(See attached sheet)

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and not to exceed 1.0 cubic feet per second, but not to exceed 6.28 million gallons annually.

- Actual construction work shall begin on or before November 20, 1977
- Proof of commencement of work shall be filed before December 20, 1977
- Work must be prosecuted with reasonable diligence and be completed on or before November 20, 1978
- Proof of completion of work shall be filed before December 20, 1978
- Application of water to beneficial use shall be made on or before November 20, 1980
- Proof of the application of water to beneficial use shall be filed on or before December 20, 1980
- Map in support of proof of beneficial use shall be filed on or before _____

Commencement of work filed JAN 19 1978

OF APPLICANT TO COMPLY
William J. Yewman STATE ENGINEER
State Engineer Roland D. Westergard

Application 30946 - Permit Terms, Continued

This permit is also issued subject to the conditions set out in a letter to the permittee dated April 22, 1977, under the signature of the State Engineer and State Public Health Engineer as follows:

1. A new well is drilled at the described point of diversion by a licensed well driller.
2. The new well is properly sealed with a 50 foot cement sanitary seal by a licensed well driller.
3. The existing well in the vicinity of the point of diversion under this permit to be plugged and sealed by filling said well with native material to within 50 feet of the surface and the remaining 50 feet to the top to be filled with concrete.
