40 miners inches equals 1 cubic foot per second

(10) The water is diverted from its source at about 1/4 mile northeasterly feet

True bearing to nearest 5 minutes distance

from the S.W. corner of Section 2, T. 21 S., R. 59

E., Mount Diablo Base and Meridian.

NOTE—Information under (10) must invariably be given when a public corner is within 6 miles, unless the State Engineer consents to some other form of description.

(11) The works are located at Sec. 6 Tp. 21 S., R. 59 E M.D.M. in SW 1/4 said

Describe as within a 40 acre subdivision of public survey or by a tie in same manner as under (10)

Remarks: This spring was originally developed by Claimants as James B. Wilson and Sons in about the year 1887, and since the death of James B. Wilson, Sr. Claimants have used the water from this spring for their cattle operating as Wilson Bros. This spring was constantly used by the cattle on the range, the cattle of Claimants being the only cattle on the range. This spring was dug out and cleaned out in 1887 and waters dammed by dam across the stream, and was cleaned out and dug out and dam renewed almost each year thereafter. Cattle can and do use water at the spring itself and also from trough established by Claimants May 15, 1911. Total flow of 1/2 miners inch is used by Claimants cattle, and dam made and maintained by Claimants makes a natural reservoir.

James B. Wilson

Subscribed and sworn to before me this 28 day of July 1911

James B. Wilson

Frank A Doherty

Notary Public in and for the County of Alameda

My Commission expires Mar. 5, 1914
