X (9) The approximate number of animals watered by the claimant during the first year ....., (Date)

was ..... cattle ..... horses ..... sheep or ..... (Other) The watering

was conducted during each of the following months ..... Unknown .....

(10) The approximate number of animals watered by the claimant in subsequent years was as follows:

100 head of cattle and 15 head of horses the year round, however primary use is in the months of April, May and June, but there is continuous use the year round; the foregoing use has existed for at least the past 40 years to claimant Jo Hibbs Christison's personal knowledge and since well before the turn of the century upon claimant's information and belief.

(11) The amount of water which has been necessary to be diverted for this purpose has been ..... the entire flow of the spring estimated at approximately ten gallons per minute.

//// ..... cubic feet per second.

448.83 gal. per min. equals 1 cubic foot per second.

(12) The works are located at NW 1/4 NE 1/4 Section 21, Township 37 North, Range 41 East, MDM (N 1/4 corner of Section 21 lies North 17°30' West a distance of approximately 705 feet)

(Describe as being within a 40-acre subdivision, section, township and range of public survey. If on unsurveyed land, it should be stated.)

Remarks: Dog Spring is relatively constant in flow approximately ten gallons per minute the year round. In the experience of the claimants there has been no run off from the spring, that is the spring water is entirely impounded and is used for stock watering purposes. Claimant has been requested by the U.S. Bureau of Land Management to enter into an Agreement and has entered into a tentative Agreement with the the BLM not to use another spring lying approximately 1 mile West of Dog Spring for stock watering purposes for an unspecified period of time. This has been requested by the U.S. BLM in an effort to assist the range in that area to restore itself from the effects of a range fire in the summer 1973. The Spring mentioned above lying approximately 1 mile west of Dog Spring is a spring of substantially smaller flow and not as accessible and not as well used for stock watering purposes as Dog Spring. Claimant is the sole grazer in this general area.

Remarks.....

The undersigned, being first duly sworn, deposes and says that the facts relative to the appropriation of water by Cecil E. Christison and Jo Hibbs Christison dba Pinson Ranch are full and correct to the best of his knowledge and belief.

If proof is not made by claimant, deponent should state on this line by virtue of what authority he represents the claimant.
