MEMORANDUM

To : Files

From: R. Davis

Date: May 11, 1989

The source of the subject proof is listed as LITTLE TELE CR; however, the map, filed under 08241 states that the source is Little Telephone Creek Tributary. The NV highway atlas indicates that Little Telephone Creek is north of the POD specified on the map, accordingly, we assumed that the map was correct and the proof was incorrect, accordingly, map 08241 was stamped with 08266.

In a telephone conversation this date with Chris Butler, Water Right Surveyor #939 with the Forest Service, Chris confirmed that an amended proof would be submitted indicating the correct source being Little Telephone Cheek Tributary. This correction was originally included in a letter received from the Forest Service this year that listed corrections to over 800 proofs. This letter was returned to the Forest Service, and Chris reported that these corrections would be made by submitting amended proofs. Chris stated that the reason that Tributary was not included in the original proof is because the software used to generate this form had a limited field, thus long names were shortened.

Chris also stated that Little Telephone Creek Tributary is in fact a spring; however, Chris apparently does not have the authority to make corrections of certain types of apparent errors. Chris stated that there are other proofs with the name "creek" in the source, that are in fact springs, but that he knows of no creeks that are named as springs.
