Remarks

The reservoir was developed for stockwater and the good storage capacity allows hauling water to other parts of the Allotment during droughts. A large pipe can be seen leaving the reservoir before it disappears underground. I've looked down slope and found nothing in evidence, but it may have been used for irrigation. The flow of N.F. Creek was measured November 2009.

The undersigned, being first duly sworn, deposes and says that the facts relative to the appropriation of water by Jim Estill are full and correct to the best of his/her knowledge and belief.

If proof is not made by claimant, deponent should state on this line by virtue of what authority he/she represents the claimant.
