Attachment to Protests by Fish Springs Ranch, LLC for Application 83857

The Protestant Vidler Water Company, Inc. (Vidler) managing member of Fish Springs Ranch, LLC (FSR) have permits, certificates and applications filed to appropriate water in Honey Lake Valley basin (097). In Ruling 3787 and 3787A, the State Engineer ruled that the total combined duty for all the permits involved in both rulings is 13,000 acre feet. According to Ruling 3787 and 3787A, there is no unappropriated water remaining in the basin. The granting of this application would unduly impair the Vidler and FSR senior permitted water rights and applications, which is detrimental to the public interest. In addition, the State Engineer has called for proofs of appropriation in Honey Lake Valley. As a result of the adjudication in Honey Lake Valley, there may be additional vested rights in the basin and therefore no water available to appropriate in the basin.

The Protestant requests that the subject application be denied.
