APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit is issued subject to existing rights. It is understood that the amount of water herein granted is only a temporary allowance and that the final water right obtained under this permit will be dependent upon the amount of water actually placed to beneficial use. It is also understood that this right must allow for a reasonable lowering of the static water level. This well shall be equipped with a two (2) inch opening for measuring depth to water. If the well is flowing, a valve must be installed and maintained to prevent waste. A totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of water begins, or before the Proof of Completion of Work is filed. This source is located within an area designated by the State Engineer, pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

The total combined amount of water granted under this permit and permit 30323 is limited to what the well covered under the two permits is capable of producing. If certificates of appropriation are issued under this permit and permit 30323, the total combined amount of appropriation granted in said certificates shall not exceed what the well covered under the two permits is capable of producing.

The total combined duty of water under this Permit and Permit 17661, Certificate 7410, Permit 22204, Certificate 6651, Permit 27437, Permit 35869, Permit 35976, Permit 36286 and Permit 36287 shall not exceed 2,555 million gallons annually. (Continued on Page 2.)

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and not to exceed 4.0 cubic feet per second, but not to exceed 943.6 million gallons annually.

Actual construction work shall begin on or before..... December 12, 1979

Proof of commencement of work shall be filed before..... January 12, 1980

Work must be prosecuted with reasonable diligence and be completed on or before..... December 12, 1980

Proof of completion of work shall be filed before..... January 12, 1981

Application of water to beneficial use shall be made on or before..... December 12, 1983

Proof of the application of water to beneficial use shall be filed on or before..... January 12, 1984

Map in support of proof of beneficial use shall be filed on or before.....

Commencement of work filed..... DEC. 24 1979
Completion of work filed..... DEC. 24 1979

Permit No. 35868

- 2 -

At least one ground water monitor well is to be installed within the place of use under Permits 35868 and 35869 at a location satisfactory to the State Engineer before any diversion of ground water from the production wells. The monitor wells must be suitably cased, perforated, sealed, and capped and must penetrate at least 75 feet below the water table.
