This application covers waters, which according to our stream measurement records, have proven to be surplus in particularly wet years. The use will be for flooding wildlife food plots primarily after the growing season and continuing on through the waterfowl nesting season. Lands will be shallow flooded as is typical for waterfowl habitat. Irrigation water for the crops on these lands is under our existing rights. No change is intended in the irrigation use of the existing rights. Only the manner of crop harvest will change. This application is not intended to waive any existing water rights or permits. This application is made with the knowledge that there is an existing downstream right to be satisfied and that in some years there will not be a surplus of water.
