Removed 340' of 4" drop pipe with 30 hp submersible pump. Measured water level at 95.6' deep and depth of well at 459.1'. Installed Mills Knife to a depth of 50' and attempted to perforate 12" casing to surface. We could not perforate because of cement seal present around casing. Installed 451' of 2" tremme pipe. The following day, we pumped in 17 yards of neat cement to fill well. Actual volume shaould have required approximately 13 yards.
