Cable ☒ Rotary ☐
Other ☐

6. LITHOLOGIC LOG

Material	Water Strata	From	To	Thickness
We pulled the pump out of the hole and cleaned the sand out of the hole. We found the well to be filled in to 90 feet with sand. After cleaning the well out to 110 feet the well was developed for 8 hours. The bottom 7 feet of the well was rocked to stop the sand. The ~~XXXX~~ pump was then put back in the hole and the well was pumped for 6 hours at the rate of 12 GPM The well was clean and sand free. At this point the well was then hooked back up the house.
