6 Additional Notes or Comments
Two strings of 2 3/8" casing in well one 2250' appeared to be abandoned previously check with client and they said it was abandoned in years past but have no record of it we tape on the top of plug to make sure it was not a bridge and it feel very solid we top off top 7" of the 2250' casing and abandon the 1528' casing and fill to top 336 gallons of cement / bentonite grout slurry casing volume is 246 gallons thus showing us that the grout permiated the gravel packed area at the well
