5 *WATER LEVEL*
Static water level 14.7 feet below land surface
Artesian flow G.P.M. P.S.I
Water temperature °F Quality

6 Additional Notes or Comments

Measured static water level at 14.7' and depth of well at 155'. Installed sand bailer and bailed debris from well to a depth of 162'. At this depth we were getting large pieces of clay, which we assumed was bottom. We then installed 16" Mill Knife to 150' and cut 6 rows per foot from 150 to 8'. Removed Mills Knife and installed 157' of 2" tremme pipe. The next day we pumped in approximately 10 yards of 7 sack sand slurry.

7 WELL PLUGGING PROCEDURE
Was well cleaned out to total depth? ☒ yes ☐ no
If well was not cleaned out to total depth, please explain why:

Was the well contaminated? ☐ yes ☒ no
Was the casing pulled? ☐ yes ☒ no If pulled from: feet to feet
Was the casing over drilled? ☐ yes ☒ no
If casing was left in place, please show where additional perforations were made:
Additional Perforations:
Type of perforater used: Mills Knife

From	feet to	feet	Number of perfs per linear foot
150	8		6
