This well was drilled by Bob Weber. Well was said to be 175' deep. Well had been abandoned because of sand (heaving). We gravel packed as much as we could, drilled sand out of inside of casing & also gravel packed inside of casing to hold down sand. Casing is to thin to drive down any more. Size and type perforations is unknown, as well as how much. Well stood open to long to get a proper seal from surface, but casing is packed solid on outside with fine sand.
