6. LITHOLOGIC LOG

Material	Water Strata	From	To	Thickness
I originally had been told that these were both 10" wells upon taking off the caps it was found to be a 10" well with 6" casing inside the 10" was perferated with a cement seal depth of seal unknown				
Told to trip in to bottom and clean it out by Tom Gallager because there was an old well log that had TD at 97' but the City then called Tom and he said all we had to do was trip in to 72' an circulate cement to surface which we did
