NOTE—Failure to record in the county in no way invalidates a water right, but if ditch or right was so recorded, supply full information under (19)

(19). The map provided by the State Engineer and attached hereto as a part of this proof is hereby accepted as correctly showing the ditch lines or irrigation works diverting or conveying the water claimed and the lands irrigated.

(20) Water from the source given and through the works described is also used for the following purposes other than irrigation: Domestic and stock purposes

(21) The character of the soil is gravelly (Sandy, gravelly, loam) The soil needs 5.00 acre-feet per annum to properly irrigate the crops. A continuous flow of 1.67 cubic feet of water per second, during the irrigation season of 6 months, is needed to irrigate each 100 acres of land.

Remarks: The map accompanying this proof is hereby made a part of same. That there is no extra water in Jim Creek, after I take what is necessary to irrigate my land and that, though the flow of Jim Creek increased after the earthquake the water has receded back to its normal at this season of the year and on July 12th, 1916 there was only about 1 second foot of water flowing through my headgate, which was all the water in the creek. That when I get all of my irrigable land in cultivation, there will be no extra water.

Jean Espheralde

Subscribed and sworn to before me this 13th day of July, 1916.

L. G. Gurleson

Notary Public in and for the County of Humboldt.
