THE STATE OF NEVADA

PROOF OF APPROPRIATION OF WATER FOR STOCK WATERING PURPOSES

From COCKLEBUR SPRING
Name of natural water course

Through Natural Channel to Reservoirs.
Name of ditch, pipe line, etc.

F.H.Murphey, the undersigned, being first duly sworn, deposes and says that the statements herein contained relative to the appropriation of water by him are full and correct to the best of his knowledge and belief.

If proof is not made by claimant, deponent should state on this line by virtue of what authority he represents the claimant

(1) Name of claimant F.H.Murphey

Address Cedarville, County of Modoc,

State of California.

(2) The means of diversion employed is Dams.
Dam and ditch, pipe line, flume, etc.

(3) The water is impounded in Reservoirs.
Troughs, reservoirs, tanks, etc.

(4) The construction of the ditch or other works was begun 1901

and completed 1901

(5) The nature of the claimant's title to the land upon which the works are located is

Public Land.

(6) The claimant's water right was (was not) recorded in the office of the County Recorder of

County, at Page of Book of

(7) The approximate number of animals watered by the claimant during the first year was

and said watering was conducted for an approximate period of days during each of the following months

From 500 to 2000 head of sheep, 50 to 500 head of cattle, and 20 to 100 head of horses have bee watered at this source since the inception of the right.

(8) The approximate number of animals watered by claimant in subsequent years was as follows:

The principal value of the range adjacent to this source is for lambing purposes and is thus used for a sheep range during the Spring months of each year. Sheep, cattle and horses in sufficient numbers to utilize substantially all the range readily available to livestock watering at this source, have been in the past and will continue to be in the future watered here.

(9) The amount of water which it has been necessary to divert for the said purpose has been ..... cubic feet per second.

40 miners inches equals 1 cubic foot per second

(10) The water is diverted from its source at S.87 50'W. 1540 feet from
True bearing to nearest 5 minutes distance

the East ½ corner of Section 16, T. 37 N., R. 18 E., Mount Diablo Base and Meridian.

NOTE—Information under (10) must invariably be given when a public corner is within 6 miles, unless the State Engineer consents to some other form of description.

(11) The works are located at NE¼ SE¼ Section 16, T37N,R18E.
Describe as within a 40-acre subdivision of public survey or by a tie in same manner as under (10)

Remarks: The reservoirs mentioned under question 3 are reconstructed in the channel from the spring each year for impounding stock water, the dams being washed out periodically by freshets. This method is considered more economical than to build permanent structures.

Remarks:

F H Murphey

Subscribed and sworn to before me this 21" day of December, 1927

Phebe M. Mickle

Notary Public in and for the County of Mado

My commission expires March 18 1930, 192

This part of form to be left blank by claimant
