(19) The map provided by the State Engineer and attached hereto as a part of this proof is hereby accepted as correctly showing the ditch lines or irrigation works diverting or conveying the water claimed and the lands irrigated.

(20) Water from the source given and through the works described is also used for the following purposes other than irrigation: stockwatering

(21) The character of the soil is sandy loam (Sandy, gravelly, loam) The soil needs 5.0 acre-feet per annum to properly irrigate the crops. A continuous flow of 3.0 cubic feet of water per second, during the irrigation season of 12 months, is needed to irrigate each 100 acres of land.

(22) Remarks: "All water which is not retained on the lands described in statements (13) & (14) reenters the natural channel of Kiaza River and/or its tributaries and is used beneficially down stream by this claimant."
