Remarks

The Rawhide RanchWell was drilled about 1933 to replace an old well at Finger Rock Cow Camp destroyed by a major earthquake, December 10 ,1932. The original Finger Rock Well was probably dug about 1880 when T.J. Bell and James Court established a toll road during the silver boom at Grantsville. It is noted on the General Land Office plats as the Luning-Grantsville Road. B&C Well northeast of Glodyke was also developed by them. Bell was a predecessor liverstock operator of the Rawhide Ranch holdings. The well location is at Rawhide Ranch Headquarters, a location of livestock concentration. This well has been continuously used by the Claimant and predecessors to the Claimants. David G. Holmgren and Jackie A. Holmgren are the successor Claimants by virtue of the chain of title on file with the State Engineer's office and are current BLM allotment holders for the Pilot-Table Mt. Allotment.

The undersigned, being first duly sworn, deposes and says that the facts relative to the appropriation of water by David G. Holmgren & Jackie A. Holmgren are full and correct to the best of his/her knowledge and belief.
Deponent is an employee of TEC Civil Engineering Consultants and has been retained by the successor Claimants to prepare and file this Amended Proof

If proof is not made by claimant, deponent should state on this line by virtue of what authority he/she represents the claimant.

Records show that livestock numbers varied from year to year. Cattle use from about 1880 to the present has been mainly in the winter. 2000 sheep were run in 1910 and this use changed to 1000-2000 Angora goats beginning in 1923 and continuing to 1942. Sheep and cattle were run until 1976. Since then cattle have used the area.
