(14) The maximum acreage irrigated in any year was at least 266.24 acres.

(15) The water claimed has ~~(has not)~~ been used for irrigation each and every year since the right was initiated.

(16) The years during which no water was used for irrigation or during which the full water right was not used were not applicable

If water was not used, or used in reduced quantity at any time, full information as to causes and duration of non-use should be given, appending a sheet if necessary

(17) The claimant's water right was (~~was not~~) recorded in the office of the County Recorder of Douglas County, said record being at page 6 of Book A of Ditch and Water Rights, and being a claim for 2/3 of the flow of Cary Creek (less the "Glover Right") of water for the irrigation of not stated acres of land in the following legal subdivisions:

Not stated

NOTE—Failure to record in the county in no way invalidates a water right, but if ditch or right was so recorded, supply full information under (17)

(18) Water from the source given and through the works described is also used for the following purposes other than irrigation:

stockwatering

domestic

storage for irrigation

(19) The character of the soil is See Remarks (Sandy, gravelly, loam). A continuous flow of 2/3 of the flow of Cary Creek less .37cfs has been used to irrigate 266.24 acres of land and acre-feet per acre per annum have been used to irrigate the crops.

(20) Remarks Additional support for this proof of appropriation is being filed under separate cover.

2/3 12/12/95

Question 5: The original ditch/flume was adequate to transport ~~1/3~~ of the flow of Cary Creek.

Question 19: The 1971 Carson Valley Area, Nevada, California Soil Survey prepared by the United States Soil Conservation indicates that most of the soils on the Ranch are of the following types: Ophir gravelly sandy loam (OgA and OgB); Ophir peat (OpB) and Ophir gravelly sandy loam, somewhat poorly drained (OnC). These soils are coarse-textured soils which formed in a sandy alluvium derived from granite. These soils can have a water table which fluctuates from 20 to 52 inches.

The undersigned, being first duly sworn, deposes and says that the facts relative to the appropriation of water by Roland and Joan P. Dreyer are full and correct to the best of his knowledge and belief.

If proof is not made by claimant, deponent should state on this line by virtue of what authority he represents the claimant
