None

Remarks [Improvements, title, etc.)

The priority for irrigation on the owned land varies from 1873 to 1882 as evidenced in the Humboldt River Decree. This is a basis for the earliest use on the open range for watering livestock. However, a priority of 1886 as set forth in the Commensurate Property Record by Chas. R. Pedlar attached to the Affidavit of Walter I. Leberski wherein it is stated Dressi Ranching Company, predecessor of the claimant, used the public domain in the vicinity of the source for 50 years prior to the year 1936 is considered for the full numbers of livestock.

The documents attached to the Affidavit of Walter I. Leberski evidence grazing use by Dressi Ranching in the area of the source with 950 cattle and 60 horses during portions of the grazing season of April 1 to November 30.

Through management actions by the Bureau of Land Management, the claimant grazes livestock within an allotment under a management plan which will vary the season of use and number of livestock from year to year.

From experience in managing livestock grazing in the area 500 head of livestock would use the source during portions of the grazing season.

Blue Basin Creek is a tributary to Susie Creek, which is also a source of stock water, within a portion of its reach for the claimant. However, as Blue Basin Creek is a major source of livestock water and is used partially independent of Susie Creek, a separate proof is made.
