ATTACHMENT TO PROTEST OF APPLICATION NO. 54027
BY LAS VEGAS VALLEY WATER DISTRICT

Application No. 54027, if approved, would prevent or interfere with the development of the community water supply in Snake Valley. The Baker Water & Sewer General Improvement District was formed for this purpose after completion of an engineering study by Eric Beyer. This study designated a source for the Baker water system that is located adjacent to Application No. 54027. Said water system is critically needed for the health and economic well-being of Snake Valley, as well as for serving the needs of some 80,000 annual visitors to Great Basin National Park.

The undersigned additionally incorporates by reference as though fully set forth herein and adops as its own, each and every other protest to the subject application filed pursuant to NRS 533.365.

Inasmuch as a water extraction and transbasin conveyance project of this magnitude has never been considered by the State Engineer, it is therefore impossible to anticipate all potential adverse affects without further information and study. Accordingly, the protestant reserves the right to amend the subject protest to include such issues as they may develop as a result of further information and study.
