ATTACHMENT FOR PROTEST OF APPLICATION 73666
(Steptoe Valley)

This application is being protested by the Bureau of Land Management because it would affect sensitive water resources on public lands managed by the BLM.

A report prepared by CH2M HILL on November 9, 2005 titled "Documentation of the Application of a Numerical Model to Simulate Ground Water Response to Pumping for the Proposed White Pine Energy Station in Steptoe Valley, Nevada" indicated a project-induced drawdown in both the shallow unconfined aquifer and the deeper confined groundwater.

This application, along with the other eight applications filed by Nevada Power Company in Steptoe Valley (Basin 179), would have the same affect as what the model showed for the proposed White Pine Energy Station. In addition, these eight applications are in the same locations as the permitted water rights held by White Pine County that were modeled. Finally, White Pine Energy changed it's proposal to use less water for it's energy station because of the results of this model/study.
