RE: SNWA Water Rights History Socio-Economic Analysis Report

Created By: Community and Economic Development Office
957 Campton St., Ste. #11
Ely, NV. 89301
Jim Garza – Director

Based on the spreadsheet below, SNWA currently controls 27.64% of all water rights in White Pine County in some form based just on the "Status" categories SNWA and/or its affiliates are currently assigned in now by the State of Nevada – Division of Water Resources.

The 2011 FYE Report from the Nevada Department of Taxation shows $314,234,535.00 were created in taxable sales in White Pine County. If you take 27.64% of this amount, $86,854,424.00, I would ask myself should one entity control 27.64% of available water rights when it does not contribute same in Taxable Sales.

The White House Rural Council (JOBS AND ECONOMIC SECURITY FOR RURAL AMERICA) Report and the Nevada issued (NEVADA INDUSTRY AND COMPETITIVE ANALYSIS) Report clearly state initiatives that need to be implemented to encourage diversification in rural areas like White Pine County.

With SNWA holding over 240,000 AFA in the queue, how does White Pine County stand a chance to take advantage of federal funds that are forthcoming when new entities that would like to develop crop production / manufacturing/ mining/ oil and gas exploration facilities in areas adjacent to these application sites if SNWA continues to submit applications to tie up availability on a first come first serve basis?

Within (9) square Township/Range blocks, the site effects a portion or all of; 102,050.84+/- acres of existing BLM Oil and Gas Leases; 9,300+/- acres of unpatented mining claims dating back as old as 03/20/1917; and (7) BLM Grazing permits holding 371,780 acres.

If this application is approved, it will provide a negative approach to diversification within White Pine County and a negative result in future expansion to our local Oil and Gas, Mining and Animal and Crop Production in White Pine County.

This application must be denied based on conflicts with existing grazing, mining exploration and fossil fuel exploration rights in the region and/or threatens to prove detrimental to the public interest in denying economic growth and diversification in alignment with Federal and State initiatives based on no water right availability to sustain new development.

Secondly, this application would be detrimental to the public interest on environmental grounds and would be environmentally unsound as it relates to the Basin from which it is proposed by potentially creating harm to wildlife and wildlife habitat, degrading of air quality, destructive of recreational and aesthetic values, degradation of water quality, and degradation of cultural resources.
