Re: Plugging of Well

Plugging of Old Well, found by Travis Ranch, when excavating sand near new well. Drilled under waiver # W-495.

Location of old well: SE 1/4 of NW 1/4 Sect. 24 T. 19 N R. 28E

We believe that this well was one of the old Fallon City wells.

Cleaned will to 235 feet with air and foam mist had clay seal from surface to 35 feet and nothing until 120 feet than more clay and dirt to 185 feet and open hole to 235 feet, at 235 we could not keep the hole open, 235 was bottom of the casing.
There was a 12 surface casing with 8 in liner to 235 feet and a 6 inch liner inside of the 8 inch. Pulled the 6 inch liner and retrieved 40 feet of liner.

Pumped Volclay grout into the bottom of the hole 25 bags, pumped cement grout above the bentonite grout used 4 yards of cement.
